Fiber-Optic Communication Systems Govind P. Agrawal, 2012-02-23 This book provides a comprehensive account of fiber optic communication systems The 3rd edition of this book is used worldwide as a textbook in many universities This 4th edition incorporates recent advances that have occurred in particular two new chapters One deals with the advanced modulation formats such as DPSK QPSK and QAM that are increasingly being used for improving spectral efficiency of WDM lightwave systems The second chapter focuses on new techniques such as all optical regeneration that are under development and likely to be used in future communication systems All other chapters are updated as well

**Fiber-Optic Communication Systems, Solutions Manual** Govind P. Agrawal, 1998-02-04 A complete up to date review of fiber optic communication systems theory and practice Fiber optic communication systems technology continues to evolve rapidly In the last five years alone the bit rate of commercial point to point links has grown from 2.5 Gb/s to 40 Gb/s and that figure is expected to more than double over the next two years Such astonishing progress can be both inspiring and frustrating for professionals who need to stay abreast of important new developments in the field Now Fiber Optic Communication Systems Second Edition makes that job a little easier Based on its author's exhaustive review of the past five years of published research in the field this Second Edition like its popular predecessor provides an in depth look at the state of the art in fiber optic communication systems While engineering aspects are discussed the emphasis is on a physical understanding of this complex technology from its basic concepts to the latest innovations Thoroughly updated and expanded Fiber Optic Communication Systems Second Edition Includes 30% more information including four new chapters focusing on the latest lightwave systems R D Covers fundamental aspects of lightwave systems as well as a wide range of practical applications Functions as both a graduate level text and a professional reference Features extensive references and chapter end problem sets

**FIBER-OPTIC COMMUNICATION SYSTEMS, 3RD ED (With CD )** Agrawal, 2007-09 Market\_Desc Although written primarily for graduate students the book can also be used for an undergraduate course at the senior level with an appropriate selection of topics The potential readership is likely to consist of senior undergraduate students graduate students enrolled in the M S and Ph D degree programs engineers and technicians involved with the telecommunications industry and scientists working in the fields of fiber optics and optical communications Special Features The third edition of a proven best seller The book is accompanied by a Solutions Manual A comprehensive up to date account of fiber optic communication systems Book is accompanied by CD ROM providing applications based on text About The Book This book is intended to fulfill the requirements of a graduate level textbook in the field of optical communications An attempt is made to include as much recent material as possible so that students are exposed to the recent advances in this exciting field The book can also serve as a reference text for researchers already engaged in or wishing to enter the field of optical fiber communications The reference list at the end of each chapter is more elaborate than what is common for a typical textbook

The listing of recent research papers should be useful for researchers using this book as a reference At the same time students can benefit from it if they are assigned problems requiring reading of original research papers A set of problems is included at the end of each chapter to help both teacher and student
