*Fluid Mechanics with Engineering Applications* R. L. Daugherty, J. B. Franzini, E. J. Finnemore, 1989      Fluid Mechanics with Engineering Applications R.L. DAUGHERTY, 1975      *An Approach to Assessing the Technical Feasibility and Market Potential of a New Automotive Device* Rand Zero Emission Fuel Saver Study Team, 2007 Save the World Air STWA has developed magnet based devices including its Zero Emission Fuel Saver ZEFS that it claims can improve vehicle fuel economy and reduce emissions These devices are designed to be fitted as original equipment onto internal combustion engines or to be retrofitted onto existing engines STWA asked the RAND Corporation to help develop a plan for assessing the technical basis required for successful commercialization of ZEFS STWA also sought RAND s advice in examining potential market opportunities for ZEFS This report summarizes RAND s analysis of these two issues concluding the following Application of magnetic fields has not been shown in the literature to lower the viscosity of automotive fuels Along with empirical testing establishing a theoretical basis underlying the effect of magnetic fields on fuel viscosity surface tension and atomization might provide useful information for developing and evaluating magnetic field based fuel treatment devices So far the test results for use of the device are at best mixed Should further laboratory analysis and in use testing provide clearer and more positive outcomes the market potential for the device will depend significantly on the advances realized from other technologies and regulatory policies and on its cost effectiveness relative to other outcomes      Compressible Flow Nuggenhalli S. Nandagopal, 2025-05-16 This book focuses on the foundations of compressible flow illustrating the use of principles of thermodynamics and fluid dynamics in the development of compressible flow equations It presents the topics in an organized manner facilitating natural logical flow of the subject matter All the relevant equations are derived rigorously using basic mathematics and mass momentum and energy conservation principles that is continuity momentum and energy equations The applications of compressible flow equations are illustrated using numerous example and practice problems The topics covered include Mach number isentropic flow stagnation static relationships compressible flow tables for air compressible flow measurements Pitot Tube Pitot Static Tube Rayleigh Pitot Equation compressible flow with area changes sonic flow sonic area sonic relationships shock waves shock wave relationships normal shock waves in nozzles moving shock waves with applications to sudden opening and closing of valves oblique shock waves and Prandtl Meyer expansion waves

compressible flow through ducts and pipes adiabatic compressible flow with friction loss Fanno Flow compressible flow with heat transfer Rayleigh Flow and isothermal compressible flow through pipelines A unique feature of this book is that it presents novel methods to solve compressible flow problems through extensive use of spreadsheets The spreadsheet based solution methods presented in this book eliminates the need for cumbersome trial and error procedures and they can be used in solving a great variety of problems just by suitably changing the required inputs This book also presents a ground breaking rigorous approach to solving gas flow problems in pipelines through the use of appropriate generalized compressibility factors and friction factors dispelling the wide range of results that one can possibly obtain from approaches such as Weymouth and Panhandle equations Includes 85 Illustrative example problems and 40 practice problems both with detailed solutions in both S I and US Customary units Presents rigorous derivations of all relevant equations using fundamental mathematics and relevant physical principles Explains concepts in an accessible and thorough manner with practical applications that readers can easily understand Extensive use of spreadsheets in solving compressible flow problems
