Tracey Tokuhama-Espinosa

In Depth Ai Podcast Editor For Beginners For Teens In America:

Banking on (Artificial) Intelligence Theodora Lau, 2025-02-12 There is no lack of hype around artificial intelligence. We have only begun to scratch the surface of what this powerful technology can do. While tech and financial services become more intertwined, cutting through the noise has become more difficult but also more crucial. As a technology, AI is essential to advancing innovation, to creating efficiencies and enhancing productivity while capturing opportunities by both incumbent financial institutions as well as fintechs. But it also comes with risks and potential for biases and disinformation that can deepen inequalities and erode trust in our society. Responsible innovation must become part of our DNA and not as an afterthought. This book provides a tailored overview of what AI specifically means for financial services, a highly regulated yet also disrupted industry. It investigates the current state of AI applications in financial services today along with the state of funding and partnerships between tech and banking industries. It also examines the key pillars of responsible AI and the importance of keeping humans in the loop. The book takes a deep dive into the use cases in the financial services industry, the challenges and opportunities, and the fragmented regulatory landscape. How can we effectively assess risks and balance innovation and customer centricity with trust in AI in financial services? Can smaller organizations reap the benefits of the technology? How can institutions deploy AI responsibly and securely and promote a fairer and more equitable future for more people? While data is about bits and bytes, the realities of AI are very much human. This book will help spark dialogue and collaboration as we journey into the future. *Bringing the Neuroscience of Learning to Online Teaching* Tracey

Tokuhamo-Espinosa, 2021 This practical resource draws on the best of neuroscience to inform decision making about digital learning. We live in unprecedented times that have pushed schools to make many decisions that have been postponed for years. For the first time since the inception of public education, teachers have been invited to redesign the learning landscape by integrating an intelligent selection of digital educational resources and changing pedagogical approaches based on information from the learning sciences. This handbook will help teachers make the most of this opportunity by showing them how to use digital tools to differentiate learning, employ alternative options to standardized testing, personalize learning, prioritize social-emotional skills, and inspire students to think more critically. The author identifies some gems in quality teaching that are amplified in online contexts, including 40 evidence-informed pedagogies from the learning sciences. This book will help all educators move online teaching and learning to new levels of confidence and success. **Book Features**
Provides quick references to key planning tools like decision trees, graphics, app recommendations, and step-by-step directions to help teachers create their own online learning courses. Guides teachers through a 12-step model for instructional design that meets both national and international standards. Shows educators how to use an all-new Digital Resource Taxonomy to select resources and how to research and keep them up to date. Explains why good instructional design and educational technology are complementary with best practices in learning sciences like Mind, Brain, and Education Science. Shares ways
