**Problems in Chemical Thermodynamics with Solutions** Maka Aleksishvili, Shota Sidamonidze, 2002 The methods of chemical thermodynamics are effectively used in many fields of science and technology Mastering these methods and their use in practice requires profound comprehension of the theoretical questions and acquisition of certain calculating skills This book is useful to undergraduate and graduate students in chemistry as well as chemical thermal and refrigerating technology it will also benefit specialists in all other fields who are interested in using these powerful methods in their practical activities

Problems In Chemical Thermodynamics, With Solutions Maka Aleksishvili, Shota Sidamonidze, 2002-11-26 The methods of chemical thermodynamics are effectively used in many fields of science and technology Mastering these methods and their use in practice requires profound comprehension of the theoretical questions and acquisition of certain calculating skills This book is useful to undergraduate and graduate students in chemistry as well as chemical thermal and refrigerating technology it will also benefit specialists in all other fields who are interested in using these powerful methods in their Basic Chemical Thermodynamics Eric Brian Smith, 1982 The major change in this edition is the practical activities addition of a new chapter which provides a simple treatment of the molecular bais of thermodynamics Numerical examples have been added but overall emphasis is again placed on a clear explanation of the underlying concepts of thermodynamics the traditional approaches to the subject are modified so that the reader is led from an examination of equilibrium in the everyday world of mechanical objects to a thorough understanding of the factors that determine equilibrium in chemical systems The results are applied to a wide range of physicochemical problems The book also gives a brief introduction to the difficult problems of non ideal solutions and the concept of activity **Problem Manual for Metallurgical Thermodynamics** Arthur E. Morris, 1973 Thermodynamics and the Free Energy of Chemical Substances Gilbert Newton Lewis, Merle Randall, 1923 The scope of thermodynamics Definitions the concept of equilibrium Conventions and mathematical methods Solutions The first law of thermodynamics and the concept of energy The fugacity Application of the second law to solutions The perfect solution The laws of the dilute solution Systems involving variables other than pressure temperature and composition A useful function called the activity and its application to solutions Change of activity with the temperature and the calculation of activity from freezing points The standard change of free energy the equilibrium constant Solutions of electrolytes The activity of strong electrolytes The activity of electrolytes from freezing point data and tables of activity coefficients Activity coefficient in mixed electrolytes the principle of the ionic strength the activity of individual ions The galvanic cell Single potentials standard electrode potentials of the elements The third law of thermodynamics The entropy of monatomic gases and a table of atomic entropies Introduction to systematic free energy calculations the free energy of elementary hydrogen and metallic hydrides Oxygen and its compouns with hydrogen and with some metals Chlorine and its compounds Bromine and its compounds Iodine and its compounds Nitrogen compounds Carbon and some of

The book also discusses the problems of non ideal solutions and the concept of activity and provides an introduction to the molecular basis of thermodynamics Over five editions the views of teachers of the subject and their students have been incorporated The result is a little more rigour in specifying the dimensions within logarithmic expressions the addition of more worked examples and the inclusion of a simple treatment of the molecular basis of thermodynamics Students on courses in thermodynamics will continue to find this popular book an excellent introductory text A Manual of Chemical Nomography Horace Grove Deming, 1918 American Chemical Journal Ira Remsen, Charles August Rouiller, 1910 Calendar Victoria College (Toronto, Ont.),1901 Calendar University of Toronto, 1900 Calendar of Victoria University in Federation with the University of Toronto ,1900 **General Bulletin** Carnegie Institute of Technology, 1940 Solutions and Solubilities Michael R.
