# IBM watsonx Code Assistant for Z

Welcome to the watsonx Code Assistant for Z interactive demo.

IBM watsonx™ Code Assistant for Z is a generative AI-assisted product built to accelerate mainframe application modernization at lower cost and with less risk than today's alternatives.

The tracks below follow developers who work together to modernize a large COBOL application that is integral to their business. They generate and insert a detailed explanation as a comment into existing COBOL, refactor a COBOL service that is dispersed across the application, transform the COBOL service to Java with the help of generative AI, then validate the newly generated Java.

Select from the four tracks to begin your product tour!

Track 01	Track 02	Track 03	Track 04
