Survival Guide for Early Career Researchers Dominika Kwasnicka, Alden Yuanhong Lai, 2022-11-08 Navigating research careers is often highly challenging for early career researchers ECRs in the social sciences The ability to thrive in research careers is complex and requires soft people and management skills and resilience that often cannot be formally taught through university coursework Written from a peer perspective this book provides guidance and establishes emotional rapport on topical issues relevant for ECRs in academia and industry The authors are ECRs who have been successful in navigating their careers and they seek to connect with readers in a supportive and collegial manner Each chapter includes elements of story telling and scientific thinking and is organized into three parts 1 a personal story that is relevant to the topic 2 key content on professional and personal effectiveness based on evidence in the psychological sociological and or management sciences and 3 action points and practical recommendations The topics covered are specifically curated for people considering undertaking research careers or already working in research including Work Hard Snore Hard Recovery from Work for Early Career Researchers Networking and Collaborating in Academia Increasing Your Scientific Impact and Having Fun in the Process Accelerating Your Research Career with Open Science Engaging with the Press and Media Make Your Science Go Viral How to Maximize the Impact of Your Research Exploring the Horizon Navigating Research Careers Outside of Academia Thinking like an Implementation Scientist and Applying Your Research in Practice Survival Guide for Early Career Researchers summarizes relevant evidence based research to offer advice in strategic but also supportive ways to ECRs It is an essential go to practical resource for PhD students postdoctoral fellows and junior faculty This book will also benefit senior researchers who are serving as mentors or delivering professional development programs administrators and educators in institutions of higher learning and anyone with an interest in building a successful research career

Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences While instructional designers are a tremendous asset to higher education not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations Drawing on a wealth of research professional experience and strategic insights this book equips new and seasoned teaching faculty and trainers with step by step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials course design and learning environments while supporting their digital literacies Rather than introduce AI as a means of outsourcing subject area expertise critical thinking or cognitive processes the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices From optimizing course alignment and accessibility practices to fostering active learning

motivation and engagement educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
