**Generative AI for Effective Software Development** Anh Nguyen-Duc, Pekka Abrahamsson, Foutse Khomh, 2024-05-31

This book provides a comprehensive empirically grounded exploration of how Generative AI is reshaping the landscape of software development. It emphasizes the empirical evaluation of Generative AI tools in real world scenarios offering insights into their practical efficacy, limitations and impact. By presenting case studies, surveys and interviews from various software development contexts, the book offers a global perspective on the integration of Generative AI, highlighting how these advanced tools are adapted to and influence diverse cultural, organizational and technological environments. This book is structured to provide a comprehensive understanding of Generative AI and its transformative impact on the field of software engineering. The book is divided into five parts, each focusing on different aspects of Generative AI in software development. As an introduction, Part 1 presents the fundamentals of Generative AI adoption. Part 2 is a collection of empirical studies and delves into the practical aspects of integrating Generative AI tools in software engineering, with a focus on patterns, methodologies and comparative analyses. Next, Part 3 presents case studies that showcase the application and impact of Generative AI in various software development contexts. Part 4 then examines how Generative AI is reshaping software engineering processes, from collaboration and workflow to management and agile development. Finally, Part 5 looks towards the future, exploring emerging trends, future directions and the role of education in the context of Generative AI. The book offers diverse perspectives as it compiles research and experiences from various countries and software development environments. It also offers non-technical discussions about Generative AI in management, teamwork, business and education. This way, it is intended for both researchers in software engineering and for professionals in industry who want to learn about the impact of Generative AI on software development.

*Innovative Methods in Korean Language Teaching* Nicola Frascini, Jieun Kiaer, 2024-12-30. *Innovative Methods in Korean Language Teaching* showcases research-based and experience-based contributions and reflections on the potential of adopting technological and non-technological innovations to promote Korean language students' learning. The chapters included in this book consider a wide range of innovative technologies and approaches, such as large language models, virtual reality solutions, metaverse platforms, multimodal teaching and critical pedagogy, and represent a variety of geographical learning contexts, from North America to Europe, from Korea to the broader Asia Pacific region. Overall, these contributions make the case for embracing new technologies instead of banning them and for accepting pedagogical shifts that take into consideration contemporary understandings of the communication teaching and learning processes. This book will be of interest to graduate students, researchers and practitioners of Korean language education and to those working on language teaching and learning in general, to inform future teaching practices through careful consideration of contemporary technologies and teaching approaches.
