exploiting outdated information and privacy laws and curating online information in a way that amplifies digital racism and targets marginalized communities They can also distribute private information to predatory entities Alarming everything they are doing is perfectly legal In this book Lamdan contends that privatization and tech exceptionalism have prevented us from creating effective legal regulation This in turn has allowed oversized information oligopolies to coalesce In addition to specific legal and market based solutions Lamdan calls for treating information like a public good and creating digital infrastructure that supports our democratic ideals **Ulrich's Periodicals Directory 2005** R.
