**AI & Language Systems: Designing LLM Workflows for Experts** Akira Minghao, If you want to master AI at the level where workflows become systems, prompts become pipelines, and ideas become automated realities, this is the book you've been waiting for. *AI Language Systems: Designing LLM Workflows for Experts* is a definitive guide for professionals who want to go far beyond basic prompting and learn how to architect advanced, scalable, and high-performance AI systems. This book reveals the mental models, frameworks, and design strategies used by top AI practitioners to build reliable, repeatable, and intelligent workflows. Instead of teaching quick tricks, this book shows you how to think like an AI systems engineer. You will learn how to design multi-step reasoning processes, integrate external tools and APIs, work with memory and context effectively, apply embeddings and vector databases, orchestrate multiple models or agents, and create AI-driven processes that can handle real-world complexity. The emphasis is on building systems that work consistently, not improvisations that fail under pressure. Through clear explanations and structured instruction, the book covers advanced prompt engineering, verification and evaluation techniques, safety considerations, architecture planning, multi-agent design, research automation, business process automation, and the long-term evolution of AI within organizations. Every chapter provides practical frameworks and actionable methods that help you design AI workflows you can depend on. This book is ideal for AI practitioners, engineers, analysts, consultants, founders, researchers, and technical leaders who want to elevate their work from using AI to architecting robust AI ecosystems. **What You Will Learn:** How to move from prompt user to AI systems architect. How to design modular, multi-step workflows for any domain. How to integrate tools, APIs, agents, and external data sources. How to implement advanced prompting, memory, and context strategies. How to use embeddings, search, and vector databases effectively. How to evaluate, verify, and improve AI system reliability. How to build business automation research.

assistants and creative production pipelines How to create scalable maintainable AI solutions that evolve with new models Why This Book Matters AI is no longer a novelty It is becoming infrastructure To remain competitive professionals need the ability to design structured dependable systems not just prompt experiments This book gives you the frameworks technical understanding and confidence to engineer AI workflows that are powerful adaptable and future ready If you are serious about mastering AI at an expert level this book will give you the knowledge and systems you need to move ahead Start building smarter stronger scalable AI systems today Order your copy now
