The Filter Bubble What Internet Is Hiding From You Eli Pariser:

The Filter Bubble Eli Pariser, 2012 Pariser delivers an eye opening account of how the hidden rise of personalization on the Internet is controlling and limiting the information we consume Something's Gotta Give Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2012 The theme of the 2011 Charleston Conference the annual event that explores issues in book and serial acquisition was Something's Gotta Give The conference held November 2-5 2011 in Charleston SC included 9 pre meetings more than 10 plenaries and over 120 concurrent sessions The theme reflected the increasing sense of strain felt by both libraries and publishers as troubling economic trends and rapid technological change challenge the information supply chain What part of the system will buckle under this pressure Who will be the winners and who will be the losers in this stressful environment The Charleston Conference continues to be a major event for information exchange among librarians vendors and publishers As it begins its fourth decade the Conference is one of the most popular international meetings for information professionals with almost 1 500 delegates Conference attendees continue to remark on the informative and thought provoking sessions The Conference provides a collegial atmosphere where librarians vendors and publishers talk freely and directly about issues facing libraries and information providers In this volume the organizers of the meeting are pleased to share some of the learning experiences that they and other attendees had at the conference

Algorithms for the People Josh Simons, 2015-07-08 How to put democracy at the heart of AI governance Artificial intelligence and machine learning are reshaping our world Police forces use them to decide where to send police officers judges to decide whom to release on bail welfare agencies to decide which children are at risk of abuse and Facebook and Google to rank content and distribute ads In these spheres and many others powerful prediction tools are changing how decisions are made narrowing opportunities for the exercise of judgment empathy and creativity In Algorithms for the People Josh Simons flips the narrative about how we govern these technologies Instead of examining the impact of technology on democracy he explores how to put democracy at the heart of AI governance Drawing on his experience as a research fellow at Harvard University a visiting research scientist on Facebook's Responsible AI team and a policy advisor to the UK's Labour Party Simons gets under the hood of predictive technologies offering an accessible account of how they work why they matter and how to regulate the institutions that build and use them He argues that prediction is political human choices about how to design and use predictive tools shape their effects Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics Showing the connection between technology regulation and democratic reform Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy

The People's Platform Astra Taylor, 2014-04-15 An invaluable primer for anyone seeking to understand why our networked world isn't all that it is cracked up to be The Guardian The Internet has been hailed as an unprecedented democratizing force a place where everyone can be heard and all can participate equally But how true is this claim In a seminal dismantling of techno utopian visions The People's Platform argues that for all that we tweet and like and share the Internet in fact reflects and amplifies real world inequities at least as much as it ameliorates them Online just as off line attention and influence largely accrue to those who already have plenty of both What we have seen so far Astra Taylor says has been not a revolution but a rearrangement Although Silicon Valley tycoons have eclipsed Hollywood moguls a handful of giants like Amazon Apple Google and Facebook remain the gatekeepers And the worst habits of the old media model the pressure to seek easy celebrity to be quick and sensational above all have proliferated on the web where aggregating the work of others is the surest way to attract eyeballs and ad revenue When culture is free creative work has diminishing value and advertising fuels the system The new order looks suspiciously like the old one We can do better Taylor insists The online world does offer a unique opportunity but a democratic culture that supports diverse voices and work of lasting value will not spring up from technology alone If we want the Internet to truly be a people's platform we will have to make it so Beautifully written and highly recommended David Byrne musician and author

Thinking Of Children: The

Singapore Children's Society Collected Lectures (2015-2021) Singapore Children's Society, 2022-09-29 This book is the second in Singapore Children's Society's series of collected lectures by distinguished speakers on various aspects of childhood. The chapters feature the speakers' personal narratives and professional expertise in their various fields of work as well as their replies to pertinent questions from members of the public about the issues faced by children growing up in Singapore. It is our hope that the book will serve as an invaluable resource for members of the public who are interested in finding out more about the changes to childhood in Singapore over the years.

Unlike other multicultural composition readers that settle for representing the plurality of American voices and cultures, Rereading America encourages students to grapple with the real differences in perspectives that arise in our complex society. With extensive editorial apparatus that puts readings from the mainstream into conversation with readings from the margins, Rereading America provokes students to explore the foundations and contradictions of our dominant cultural myths.

The Hastings Law Journal, 2012 **Personalisierungsgrad der Google-Suchtreffer anhand des Suchbegriffes "Sankt Pauli"** Felicitas Schneider, 2019-11-05 Studienarbeit aus dem Jahr 2017 im Fachbereich Medien/Kommunikation/Multimedia/Internet/neue Technologien, Note 1,3 Rheinische Friedrich-Wilhelms-Universität Bonn, Medienwissenschaft, Sprache Deutsch. Abstract: Mit einem Marktanteil von über 90 Prozent ist Google die am häufigste genutzte Suchmaschine in Deutschland. Begründet durch die hohen Nutzungszahlen wird Google demzufolge eine tragende Rolle als Informationsgatekeeper in der Informationsbeschaffung der Nutzer_innen zuteil. Google hat demzufolge einen nicht zu unterschätzenden Einfluss auf das Wissen, die intellektuelle Weiterentwicklung und die politische Meinungsbildung seiner User_innen. Diese fördern Google mit sensiblen Daten, stellen intime Fragen und vertrauen darauf, dass Google ein neutraler Berater ist, der allen auf die gleiche Frage die gleiche Antwort beziehungsweise die gleichen Suchergebnisse gibt. Allerdings ist Google kein neutraler Berater. Algorithmische Personalisierung ist, wenn auch ein junges, ein omnipotentes Phänomen im Nutzer_innen-Alltag. Trotzdem sind weder Funktionsmechanismen noch Wirkung algorithmischer Selektion und Personalisierung bislang geklärt. Konzerne wie Google halten ihren Algorithmus geheim, um präzise Antworten auf die Fragen nach Einfluss, Funktionsweise oder auch Wirkung algorithmischer Personalisierung geben zu können. Erfordert das Themenfeld aktuell verstärkt wissenschaftliche Zuwendung aus diversen Fachbereichen? Ein viel diskutiertes Konzept stammt von Eli Pariser: Die Filterblase. In ihr sind User_innen nur Inhalten ausgesetzt, die ihren algorithmisch berechneten Interessen entsprechen. Teil der Filterblase sind personalisierte Google-Suchergebnisse. Der Grad der interessenorientierten Personalisierung von Google-Suchergebnissen wie

deutlich sich diese also unterscheiden soll in der vorliegenden Hausarbeit anhand einer Fallstudie erforscht werden. Werden bei User_Innen die sich für Fußball interessieren bei der Google Suche nach dem neutralen Begriff Sankt Pauli andere Suchergebnisse generiert als Nutzer_Innen die sich nicht für Fußball sondern für Sightseeing und Reisen interessieren. Ermittelt wird dies indem Proband_Innen eingeteilt in eine Kontrollgruppe und eine Versuchsgruppe den Begriff Sankt Pauli googlen und ihre Suchergebnisse anschließend verglichen werden. Ausgehend von den ermittelten Unterschieden lassen sich Rückschlüsse auf die Intensität der interessenorientierten Personalisierung ziehen.

The Filter Bubble Eli

Pariser, 2011-05-12 An eye opening account of how the hidden rise of personalization on the Internet is controlling and limiting the information we consume. In December 2009 Google began customizing its search results for each user. Instead of giving you the most broadly popular result Google now tries to predict what you are most likely to click on. According to MoveOn.org board president Eli Pariser Google's change in policy is symptomatic of the most significant shift to take place on the Web in recent years: the rise of personalization. In this groundbreaking investigation of the new hidden Web Pariser uncovers how this growing trend threatens to control how we consume and share information as a society and reveals what we can do about it. Though the phenomenon has gone largely undetected until now, personalized filters are sweeping the Web, creating individual universes of information for each of us. Facebook, the primary news source for an increasing number of Americans, prioritizes the links it believes will appeal to you so that if you are a liberal you can expect to see only progressive links. Even an old media bastion like The Washington Post devotes the top of its home page to a news feed with the links your Facebook friends are sharing. Behind the scenes a burgeoning industry of data companies is tracking your personal information to sell to advertisers: from your political leanings to the color you painted your living room to the hiking boots you just browsed on Zappos. In a personalized world we will increasingly be typed and fed only news that is pleasant, familiar, and confirms our beliefs, and because these filters are invisible we won't know what is being hidden from us. Our past interests will determine what we are exposed to in the future, leaving less room for the unexpected encounters that spark creativity, innovation, and the democratic exchange of ideas. While we all worry that the Internet is eroding privacy or shrinking our attention spans, Pariser uncovers a more pernicious and far-reaching trend on the Internet and shows how we can and must change course. With vivid detail and remarkable scope, The Filter Bubble reveals how personalization undermines the Internet's original purpose as an open platform for the spread of ideas and could leave us all in an isolated, echoing world.

The Hype Machine Sinan Aral, 2020-09-15 A landmark

insider's tour of how social media affects our decision making and shapes our world in ways both useful and dangerous, with critical insights into the social media trends of the 2020 election and beyond. The book might be described as prophetic. At least two of Aral's three predictions have come to fruition. New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY WIRED. LONGLISTED FOR THE PORCHLIGHT BUSINESS BOOK AWARD. Social media connected the world and gave rise to

fake news and increasing polarization It is paramount MIT professor Sinan Aral says that we recognize the outsize effect social media has on us on our politics our economy and even our personal health in order to steer today s social technology toward its great promise while avoiding the ways it can pull us apart Drawing on decades of his own research and business experience Aral goes under the hood of the most powerful social networks to tackle the critical question of just how much social media actually shapes our choices for better or worse He shows how the tech behind social media offers the same set of behavior influencing levers to everyone who hopes to change the way we think and act from Russian hackers to brand marketers which is why its consequences affect everything from elections to business dating to health Along the way he covers a wide array of topics including how network effects fuel Twitter s and Facebook s massive growth the neuroscience of how social media affects our brains the real consequences of fake news the power of social ratings and the impact of social media on our kids In mapping out strategies for being more thoughtful consumers of social media The Hype Machine offers the definitive guide to understanding and harnessing for good the technology that has redefined our world overnight
