Confluence of Artificial Intelligence and Robotic Process Automation Siddhartha Bhattacharyya, Jyoti Sekhar Banerjee, Debashis De, 2023-03-13 This book provides a detailed insight into Robotic Process Automation RPA technologies

linked with AI that will help organizations implement Industry 4.0 procedures. RPA tools enhance their functionality by incorporating AI objectives such as use of artificial neural network algorithms, text mining techniques, and natural language processing techniques for information extraction and the subsequent process of optimization and forecasting scenarios for the purpose of improving an organization's operational and business processes. The target readers of this book are researchers, professors, graduate students, scientists, policymakers, professionals, and developers working in the IT and ITES sectors, i.e. people who are working on emerging technologies. This book also provides insights and decision support tools necessary for executives concerned with different industrial and organizational automation-centric jobs, knowledge dissemination, information, and policy development for automation in different educational, government, and non-government organizations. This book is of special interest to college and university educators who teach AI, machine learning, blockchain, business intelligence, cognitive intelligence, and brain intelligence courses in different capacities.

Artificial Intelligence in Public Administration Bożena Skotnicka-Zasadzień, Radosław Wolniak, 2025-07-11. This book presents a conceptualization of the process of using artificial intelligence (AI) in public administration along with its operationalization in terms of technology competence and the use of AI by employees of municipal offices. The authors offer a holistic examination drawing on a multidisciplinary approach that combines theoretical insights with empirical analyses to develop a theoretical model for improving the use of AI in public administration. The book provides a nuanced understanding of the complex interactions between AI technologies, governance structures, and public service delivery models, as well as diverse case studies across administrative domains to offer cross-national insights and shed light on the contextual factors shaping AI adoption and implementation strategies. Through dedicated chapters on ethics and safety, the book also critically examines the challenges and opportunities policymakers must navigate when implementing AI. Combining theory with practice, this book will be of interest to scholars and postgraduate students in the fields of public administration, policy studies, governance, as well as artificial intelligence and technology management.
