Virtual Microscopy and Virtual Slides in Teaching, Diagnosis, and Research Robert W. Ogilvie, 2005-06-22 Despite a brief history the technologies of virtual microscopy and virtual slides have captured the imagination of many especially this current crop of students Having come of age in the computer and Internet age this emerging group of technicians and researchers tends to display a distinct preference for virtual slides and virtual microscopes Photoshop for Video Richard Harrington, 2007 Photoshop is a graphics tool for video professionals engaged in making graphics for use in television motion graphics podcasting and DVD Presentations and hands on tutorials demonstrate the fundamental concepts and techniques for combining still and moving images **Artificial Intelligence Applications In Human Pathology** Ralf Huss, Michael Grunkin, 2022-03-04 Artificial Intelligence Applications in Human Pathology deals with the latest topics in biomedical research and clinical cancer diagnostics With chapters provided by true international experts in the field this book gives real examples of the implementation of AI and machine learning in human pathology Advances in machine learning and AI in general have propelled computational and general pathology research Today computer systems approach the diagnostic levels achieved by humans for certain well defined tasks in pathology At the same time pathologists are faced with an increased workload both quantitatively numbers of cases and qualitatively the amount of work per case with increasing treatment options and the type of data delivered by pathologists also expected to become more fine grained AI will support and leverage mathematical tools and implement data driven methods as a center for data interpretation in modern tissue diagnosis and pathology Digital or computational pathology will also foster the training of future computational pathologists those with both pathology and non pathology backgrounds who will eventually decide that AI based pathology will serve as an indispensable hub for data related research in a global health care system Some of the specific topics explored within include an introduction to DL as applied to Pathology Standardized Tissue Sampling for Automated Analysis integrating Computational Pathology into Histopathology workflows Readers will also find examples of specific techniques applied to specific diseases that will aid their research and treatments including but not limited to Tissue Cartography for Colorectal Cancer Ki 67 Measurements in Breast Cancer and Light Sheet Microscopy as applied to Virtual Histology The key role for pathologists in tissue diagnostics will prevail and even expand through interdisciplinary work and the intuitive use of an advanced and interoperating AI supported pathology workflow delivering novel and complex features that will serve the understanding of individual diseases and of course the patient New Avenues for the Development of Advanced Immunotherapies: Capitalizing on Studies of the B and T Cell Receptor Repertoire Massimiliano Mazza, Fabio Nicolini, Maria Del Mar Naranjo Gomez, Mireia Pelegrin, 2025-11-20 Immunotherapy has emerged as a transformative domain within oncology and a variety of other medical fields demonstrating its potential through the use of immune checkpoint inhibitors adoptive cell therapies and monoclonal antibodies These strategies have significantly improved cancer treatment outcomes

and broadened therapeutic horizons Nonetheless the clinical application of numerous therapeutic and diagnostic targets remains limited reducing the translational impact of molecular biology advances NSG based technologies focusing on B and T cell receptor repertoires have enabled the development of next generation immunotherapies such as CAR therapies engineered antibodies and bispecific antibodies enhancing treatment options across infectious diseases autoimmune disorders and cancers This Research Topic aims to provide a comprehensive summary of current methodologies used in the creation and development of pertinent immunotherapies It seeks to present an up to date exploration of the rapidly evolving fields of antibody development and immune receptor repertoire analysis emphasizing their clinical relevance across various disease states including autoimmune and infectious diseases and particularly cancer To expand the boundaries of molecular immunology and immunotherapy development this Research Topic encourages contributions that explore diverse aspects including but not limited to o Novel techniques for discovering and crafting antibodies and receptor specific molecules ScFv VHH o Innovative methods for identifying antigens associated with antibodies and TCRs o Creation of databases cataloging T and B cell receptor repertoires from individuals and patients exposed to specific conditions o Preclinical studies validating the efficacy of targeted immunotherapies and diagnostics such as CAR therapies ADCs BiTEs and companion diagnostics With the adoption of advanced tools like NGS in receptor complexity analysis and screening the future of immunotherapy looks promising potentially ushering in a new era of enhanced specificity and efficacy in treatment across multiple diseases Contributions ranging from original research articles to comprehensive reviews are welcomed to deepen understanding and push the boundaries of this exciting field Manuscripts consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases which are not accompanied by robust and relevant validation clinical cohort or biological validation in vitro or in vivo are out of scope for this topic
