Think Like Google Tom Gerencer, 2019-12-31

Why is SEO like eating rocks You struggle to rank high in Google but it's fiendishly difficult Even when you manage to rank your efforts invariably sink in the content morass Then Google comes along with its next alliteratively named update and wham you're in the dumps Plus are keywords natural Does it make sense to write something based on a spreadsheet full of algorithm generated turns of phrase It turns out things are getting better when it comes to SEO It's not magic It's not rocket science or even computer science In its secret heart SEO comes down to empathy How can that be true Google is an algorithm right How can it know how people feel Well it doesn't but it doesn't have to Yes Google uses keywords to rank your pages But it's trying not to and it's succeeding It doesn't do that with some advanced and frightening AI Instead it uses user votes Every time you search for something on the internet Google serves up a list of articles that might be what you're looking for When you click one Google sees that happen Then it starts a virtual stopwatch If you come back seconds later to click another link Google sees that too and notes it But if you stay in that article for 15 minutes Google notes that too This happens 63 000 times every second all day every day Google is watching and recording all of it God may note the fall of a sparrow but Google notes each mouse click It knows the pages people stay in longer and the pages people flee like their digital houses are on fire Then it floats the popular pages higher in the search results and drops the unloved ones down into the pits of SEM hell What does this mean for you It means Google is all about empathy No it doesn't empathize with us But it records our digital votes for every piece of content on the web In this way it approximates our empathy It sees into our hearts We can use this All it means is that we have to empathize with readers right Do that find out what the reader needs and deliver it and we'll become the better mousetrap that the world will beat a path to Except it's not so easy to see into the searcher's secret heart That's where true SEO comes in We use keyword research not to put the right mix of terms into our content but to build empathy Once we know what terms people are searching in connection with our topic we get a sense for how to build that piece of content We use competitive analysis social media and a dozen other tools to think like Google and

deliver what the reader wants In this book you ll learn Why SEO Is Like Eating Rocks Google Is About Empathy Not Keywords How to Use Keywords to Think Like Google How to Use Competitive Analysis and Social Media Research to Rank Why Actionable Advice Should Be Your Shining Star Why Engaging Writing Matters and How to Do it Right How to Serve the Reader Through Better Structure What Google Thinks About Backlinks The World Google is Building and How to Stay on Top of It What Sales Writing Can Teach You About SEO How to Write H1s and H2s That Think Like Google How to Do it Faster Where Journalism Fits InThink Like Google is a groundbreaking book that takes the mystery and magic out of SEO and shows even beginners how to do it right Author Tom Gerencer built traffic for a money site from 0 to 600 000 readers a month in 18 months through solid SEO In a team of three writers he helped build a career site from 1M to 3 5M readers a month He s a regular contributor to Boys Life and Scouting and is published in Better Homes Gardens and Costco Connection [Online Businesses For Mom](#) Andrew K Bolden,2023-06-13 Are you a mom looking to build a successful online business from the comfort of your home In Online Business For Mom Navigating the World of Remote Jobs and Entrepreneurship we delve into the myriad choices available to you while working from home The first step is to determine if working from home aligns with your aspirations Once you ve made that decision it s time to explore the types of work from home jobs that best suit your skills and interests With numerous options available for work from home both online and offline finding the right employment begins with assessing your talents and professional needs This book serves as your guide to taking that crucial first step towards a thriving work from home mom career Transitioning from traditional employment to a work from home setup can be a natural progression Many women find opportunities as independent contractors within their industry leveraging their prior job history as a springboard for success in the work from home realm For those who view their role as stay at home moms as an opportunity to explore new paths entry level employment as an independent contractor is available Various professions such as customer service data entry virtual personal assistance and medical transcription can be pursued from the comfort of your home requiring only a reliable internet connection and a functional phone If you aspire to launch your own business the possibilities are endless Consider starting a direct sales venture offering quality goods from renowned brands to your network of friends and neighbors Earn commissions through sales and by hiring others to market these sought after items From candles to kitchen supplies to aromatherapy goods numerous direct sales organizations cater to diverse interests The Internet is a powerful tool for generating income from home and many women harness its potential Explore a range of career possibilities available online such as advertising your skills as a freelance writer virtual assistant or web designer Additionally you can establish an online shop to sell products you manufacture or have the rights to sell Countless stay at home moms have successfully launched their companies online through well known auction sites like eBay while others have found their niche in internet marketing driving traffic to websites and promoting specific goods and services Finding the right work from home option starts with understanding your preferences If you enjoy interacting with
