**The Geometry of Choice** Marek Kuźniak,2021-08-19 This book offers a cognitive semantic insight into the roots of the human decisionmaking process using the metaphor of CHOICE as CUBE The areas of key interest are language culture and education as forms of social organization This book addresses issues relevant to a number of fields including social epistemology cognitive linguistics cognitive anthropology philosophy culture and education studies and will be of interest to readers in these and related disciplines *Cognitive Lexicography* Carolin Ostermann,2015-07-31 English lexicography and linguistics have always shared close ties yet the potential of cognitive linguistics for lexicography has only been hesitantly acknowledged in the literature This is what cognitive lexicography attempts to change by using insights gained in cognitive semantic research for the development of new dictionary features After a short survey of the history and practice of English monolingual learner lexicography as well as an outline of the relationship between linguistics and lexicography three new dictionary features are developed They cover three different cognitive semantic theories as well as three different parts of the monolingual dictionary entry each time for a new set of lexemes Frame semantics conceptual metaphor theory as well as cognitive conceptions of polysemy are used to create a new example section for agentive nouns a new defining structure for emotion terms and a new microstructural arrangement for particle entries Dictionary analyses on all as well as user studies on two of the features complement these suggestions The monograph thus presents a new approach to lexicography that incorporates into its description of lexical items how humans perceive and conceptualise language

### **Why are quotations in academic**

**papers taken from only secondary sources problematic?** Sandra Intemann,2016-07-15 Essay from the year 2016 in the

subject Philosophy Practical Ethics Aesthetics Culture Nature Right grade 1 3 Leuphana Universit t L neburg

Wissenschaftsethik language English abstract To find out whereas quotations in academic articles and or monographs solely

out of secondary and not primary sources are problematic from the perspective of academic ethics in general and business

ethics in particular one will first have a closer look on the key terms An academic article is a scientific text published in a

scientific journal and supervised by other scientists A monograph is a scientific text about a single subject by one author

Sources are distinguished in primary and secondary sources primary sources are scientific research results which are

published at first hand containing Secondary sources refer to a primary source which was published by another author and

not collected by the author himself For an evaluation of the use of the sources in a business or academic environment ethical

standards and moralities are used Within academic ethics ssientists have the duty to act responsibly and to define moralities

for their practice and the way they do research and publish their results On the other hand the business ethics defines right

or wrong behaviour in a business context To discuss whereas the use of secondary sources is problematic one will analyse

the involved parties which are the users of the sources the author of the primary source the author of the secondary source

and the scientific community Within all parties involved in the problem there is always a least privileged party according to

John Rawls On the one hand using solely sources could be interpreted as one kind of plagiarism even if the source is cited

correctly Further the readers do not make an own effort into research because she takes the easy way out using solely secondary sources The readers have to wonder whether it is legitimate to rely on the author of the secondary source that he summarized analysed etc the primary source correctly It would have a massive negative impact on academic and business ethics if the author of the secondary source made a mistake in summarizing analysing or wrong conclusion drawing As a result wrong information would be used for following work in business areas or research in academic areas On the other hand the access to primary sources may be difficult or even not possible so the use of a secondary source is the only way to use the information Further one has to wonder whether it is it legal to intervene to solely use secondary sources as it violates the copyright law
