

## Interpreting a Human Pedigree

Use the pedigree below to answer 1-5

1. In a pedigree, a square represents a male. If it is darkened he has hemophilia; if clear, he had normal blood clotting.

- How many males are there? **8**
- How many males have hemophilia? **3**

2. A circle represents a female. If it is darkened, she has hemophilia; if open she is normal.

- How many females are there? **8**
- How many females have hemophilia? **2**

3. A marriage is indicated by a horizontal line connecting a circle to a square.

- How many marriages are there? **3**

4. A line perpendicular to a marriage line indicates the offspring. If the line ends with either a circle or a square, the couple had only one child. However, if the line is connected to another horizontal line, then several children were produced, each indicated by a short vertical line connected to the horizontal line. The first child born appears to the left and the last born to the right.

- How many children did the first couple (couple in row I) have? **2**
- How many children did the third couple (couple in row III) have? **7**

5. Level I represent the first generation, level II represents the second generation.

- How many generations are there? **4**
- How many members are there in the fourth generation? **7**

Use the pedigree below to answer 6-12

6. Write the generation on the pedigree numbers (roman numerals).

7. Which members of the family above are afflicted with Huntington's Disease? **I-1, II-2, II-3, II-7, III-3**
