industries today there is still confusion around how to most efficiently use these capabilities to realize the most benefits. There is a diverse scope of AI and ML solutions ranging from models that aid in medical discoveries to models that detect fraudulent banking behavior to protect consumers and financial institutions from costly financial breaches. Adding to the complexity of how AI and ML can help enterprises solve their evolving business demands is the growing number of available tools and product offerings to bring these capabilities to life on the IBM Z platform. This IBM Redpaper publication can help you better understand the uniquely advantageous roles AI and IBM Z can play in helping your organization realize your business goals. It introduces some of the most critical AI on IBM Z use cases currently being worked on across multiple industries and describes component suggestions with high level reference architectures for the implementation of each use case. We cover the following use cases: Artificial intelligence for IT operations use cases, Data and artificial intelligence operations use cases, Use cases for artificial intelligence in chatbots, Financial services sector use cases, Public sector use cases, Healthcare sector use cases, Retail and insurance sector use cases. This paper is intended for IT architects to understand the integration and components of the solution at a high level and IT management and decision makers to better understand how these AI on IBM Z use cases can be applied to help solve your business problems.
