### **Pastoralists Equality Hierarchy And The State:**

**Pastoralists** Philip Carl Salzman, 2018-02-13 Drawing upon the author's extensive field research among pastoral peoples in the Middle East India and the Mediterranean and on more than 30 years of comparative study of pastoralists around the world *Pastoralists* is an authoritative synthesis of the varieties of pastoral life At an ethnographic level the concise volume provides detailed analyses of divergent types of pastoral societies including segmentary tribes tribal chiefdoms and peasant pastoralists At the same time it addresses a set of substantive theoretical issues ecological and cultural variation equality and inequality hierarchy and the basis of power and state power and resistance The book validates pastoralists as a conceptual category even as it reveals the diversity of societies subsistence strategies and power arrangements subsumed by that term

**Democracy and the Paradox of Developmental State in Nigeria's Fourth Republic** Janet Monisola Oluwaleye, Olatunji Ebenezer Olugbenga, Olamide Temitayo Ojogbade, 2025-04-29 In *Democracy and the Paradox of Developmental State in Nigeria's Fourth Republic* selected scholars delve into the intricate dynamics between democratic governance and the aspirations of a developmental state in Nigeria's contemporary political landscape This thought provoking work critically examines the tension between the principles of democracy and the need for effective state intervention in economic development exploring how the Fourth Republic has navigated this complex interplay Through a comprehensive analysis the book unveils the contradictions inherent in Nigeria's political and economic structure revealing how democratic ideals often clash with the realities of governance policy implementation and economic progress With empirical evidence and insightful theory the book highlights the challenges and opportunities faced by Nigeria as it seeks to balance the imperatives of democratic accountability with the goals of state led development This book will be of great benefit to policy makers globally and constitutes an important contribution to the literature on developmental issues

**The Evolution of Social Institutions** Dmitri M. Bondarenko, Stephen A. Kowalewski, David B. Small, 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World from prehistory to the present This approach is based on examining social evolution through the evolution of social institutions Evolution is defined as the process of structural change Within this framework the society or culture is seen as a system composed of a vast number of social institutions that are constantly interacting and changing As a result the structure of society as a whole is also evolving and changing The authors posit that the combination of evolving social institutions explains the non linear character of social evolution and that every society develops along its own pathway and pace Within this framework society should be seen as the result of the compound effect of the interactions of social institutions specific to it Further the transformation of social institutions and relations between them is taking place not only within individual societies but also globally as institutions may be trans societal and even institutions that operate in one society can arise as a reaction to trans societal trends and demands The book argues that it may be more productive to look at institutions even

within a given society as being parts of trans societal systems of institutions since despite their interconnectedness societies still have boundaries which their members usually know and respect Accordingly the book is a must read for researchers and scholars in various disciplines who are interested in a better understanding of the origins history successes and failures of social institutions **Pastoralist Resilience to Environmental Collapse in East Africa since 1500** Gufu

Oba,2024-02-23 This book explores pastoralist farmers approaches to environmental disaster management in East Africa charting their responses and adaptations to famine pandemics natural disasters and historical events Using a dynamic adaptive cycle theoretical framework it uses social memory to reconstruct an event history calendar thus combining social memory and written historical records to reconstruct the adaptive strategies of pastoralists It explores the climate history of the southern Ethiopian and northern Kenyan frontier considering in particular the impact of the colonial period and independence thereafter providing a significant contribution to debates in African environmental history *Being a State*

*and States of Being in Highland Georgia* Florian Mühlfried,2014-05-01 The highland region of the republic of Georgia one of the former Soviet Socialist Republics has long been legendary for its beauty It is often assumed that the state has only made partial inroads into this region and is mostly perceived as alien Taking a fresh look at the Georgian highlands allows the author to consider perennial questions of citizenship belonging and mobility in a context that has otherwise been known only for its folkloric dimensions Scrutinizing forms of identification with the state at its margins as well as local encounters with the erratic Soviet and post Soviet state the author argues that citizenship is both a sought after means of entitlement and a way of guarding against the state This book not only challenges theories in the study of citizenship but also the axioms of integration in Western social sciences in general Inner Asia and the Spatial Politics of Empire William

Honeychurch,2014-11-05 This monograph uses the latest archaeological results from Mongolia and the surrounding areas of Inner Asia to propose a novel understanding of nomadic statehood political economy and the nature of interaction with ancient China In contrast to the common view of the Eurasian steppe as a dependent periphery of Old World centers this work views Inner Asia as a locus of enormous influence on neighboring civilizations primarily through the development and transmission of diverse organizational models technologies and socio political traditions This work explores the spatial management of political relationships within the pastoral nomadic setting during the first millennium BCE and argues that a culture of mobility horse based transport and long distance networking promoted a unique variant of statehood Although states of the eastern steppe were geographically large and hierarchical these polities also relied on techniques of distributed authority multiple centers flexible structures and ceremonialism to accommodate a largely mobile and dispersed populace This expertise in spatial politics set the stage early on for the expansionistic success of later Asian empires under the Mongols and Manchus Inner Asia and the Spatial Politics of Empire brings a distinctly anthropological treatment to the prehistory of Mongolia and is the first major work to explore key issues in the archaeology of eastern Eurasia using a

comparative framework The monograph adds significantly to anthropological theory on interaction between states and outlying regions the emergence of secondary complexity and the growth of imperial traditions Based on this approach the window of Inner Asian prehistory offers a novel opportunity to investigate the varied ways that complex societies grow and the processes articulating adjacent societies in networks of mutual transformation **Between Empires** Greg Fisher,2011-04-14 In *Between Empires* Greg Fisher tackles the problem of pre Islamic Arab identity by examining the relationship between the Roman Empire and the Empire of Sasanian Iran and a selection of their Arab allies and neighbours the Jafnids Nasrids and Hujrids Fisher focuses on the last century before the emergence of Islam and stresses the importance of a Near East dominated by Rome and Iran for the formation of early concepts of Arab identity In particular he examines cultural and religious integration political activities and the role played by Arabic as factors in this process He concludes that interface with the Roman Empire in particular played a key role in helping to lay the foundation for later concepts of Arab identity and that the world of Late Antiquity is as a result of enduring interest in our understanding of what we now call the Middle East **Saudi Arabia and the Gulf Arab States Today** Sebastian Maisel,John A. Shoup,2009-02-17 This extremely timely and helpful ready reference will familiarize all students and readers with the Gulf region and Saudi Arabia Bahrain Dubai the UAE Kuwait Oman Yemen and Qatar These states are bound by the desert culture the Gulf new oil economy and Islam to name some commonalities Most Americans know something about the region such as oases dates camels oil Bedouin tribes and the legends of Lawrence of Arabia to Osama bin Laden Islamic concepts and practices are still unfamiliar On one extreme Saudi Arabia the cradle of Islam has been largely closed off to Western tourists On the other extreme Dubai courts tourist dollars as it constructs modern architectural showcases This is the first A Z encyclopedia to focus on the Gulf illuminating the land people religion culture and traditions institutions economy and much more for general readers The more than 200 essay entries have a current focus with historical context as necessary The breadth of coverage means that this resource will be of use for a wide range of researchers and browsers Besides individual entries on each state major cities and regions are also profiled The natural environment and human adaptation to it receives significant space Islamic customs and rules and various interpretations are clearly explained Essays on topics such as key public figures institutions major events politics and state structures some based on sources often not available in English make this two volume set the first choice resource for accurate information Suggestions for further reading accompany most entries a chronology selected bibliography and photos also complement the text **Socialising Complexity** Sheila Kohring,Stephanie Wynne-Jones,2007-11-30 *Socialising Complexity* introduces the concept of complexity as a tool rather than a category for understanding social formations This new take on complexity moves beyond the traditional concern with what constitutes a complex society and focuses on the complexity inherent in various social forms through the structuring principles created within each society The aims and themes of the book can thus be summarized as follows to introduce the idea of complexity

as a tool which is pertinent to the understanding of all types of society rather than an exclusionary type of society in its own right to examine concepts that can enhance our interpretation of societal complexity such as heterarchy materialization and contextualization These concepts are applied at different scales and in different ways illustrating their utility in a variety of different cases to reestablish social structure as a topic of study within archaeology which can be profitably studied by proponents of both processual and post processual methodologies
