Climate Change, Hazards and Adaptation Options Walter Leal Filho, Gustavo J. Nagy, Marco Borga, Pastor David Chávez Muñoz, Artur Magnuszewski, 2020-02-14 This book addresses the issue of climate change risks and hazards holistically. Climate change adaptation aims at managing climate risks and hazards to an acceptable level, taking advantage of any positive opportunities that may arise. At the same time, developing suitable responses to hazards for communities and users of climate services is important in ensuring the success of adaptation measures. But despite this knowledge about adaptation options, including possible actions that can be implemented to improve adaptation and reduce the impacts of climate change hazards, is still limited. Addressing this need, the book presents studies and research findings and offers a catalogue of potential adaptation options that can be explored. It also includes case studies providing illustrative and inspiring examples of how we can adapt to a changing climate. [The SAGE Handbook of Social Network Analysis](#) John Scott, Peter J.
