It is a method of accomplishing any task using five simple and consistent steps: Prepare, Organize, Work, Evaluate, Rethink. The P O W E R framework that Math instructors have come to know and love is at the core of each section, and new study strategies and exercises have been integrated with every chapter to better help students successfully learn math concepts while at the same time developing habits that will serve them well throughout their college careers and in their daily lives. The conversational writing style, practical applications, innovative student resources, and expanded available in ALEKS makes this an appealing and very teachable option for faculty.
