Basic Black-Scholes: Option Pricing and Trading (Revised Fourth) Timothy Falcon Crack, 2017-12-07 THE
 AUTHOR Dr Crack studied PhD level option pricing at MIT and Harvard Business School taught undergraduate and MBA
 option pricing at Indiana University winning many teaching awards was an independent consultant to the New York Stock
 Exchange worked as an asset management practitioner in London and has traded options for over 15 years This unique
 mixture of learning teaching consulting practice and trading is reflected in every page SUMMARY OVERVIEW This revised
 fourth edition of Basic Black Scholes gives extremely clear explanations of Black Scholes option pricing theory and discusses
 direct applications of the theory to option trading The presentation does not go far beyond basic Black Scholes for three
 reasons First a novice need not go far beyond Black Scholes to make money in the options markets Second all high level
 option pricing theory is simply an extension of Black Scholes and Third there already exist many books that look far beyond
 Black Scholes without first laying the firm foundation given here The trading advice does not go far beyond elementary call
 and put positions because more complex trades are simply combinations of these WHAT MAKES THIS BOOK SPECIAL OR
 UNIQUE It contains the basic intuition you need to trade options for the first time or interview for an options job Honest
 advice about trading there is no simple way to beat the markets but if you have skill this advice can help make you money
 and if you have no skill but still choose to trade this advice can reduce your losses Full immersion treatment of transactions
 costs T costs Lessons from trading stated in simple terms Stylized facts about the markets e g how to profit from reversals
 when are T costs highest lowest during the trading day implications of the market for corporate control etc How to apply
 European style Black Scholes pricing to the trading of American style options Leverage through margin trading compared to
 leverage through options Black Scholes option pricing code for the HP17B HP19B and HP12C Two downloadable
 spreadsheets The first allows the user to forecast T costs for option positions using simple models The second allows the user

to explore option sensitivities including the Greeks Practitioner Bloomberg Terminal screenshots to aid learning Simple discussion of continuously compounded returns Introduction to paratrading trading stocks side by side with options to generate additional profit Unique regrets treatment of early exercise decisions and trade offs for American style calls and puts Unique discussion of put call parity and option pricing How to calculate Black Scholes in your head in 10 seconds also in Heard on The Street Quantitative Questions from Wall Street Job Interviews Special attention to arithmetic Brownian motion with general pricing formulae and comparisons to Bachelier 1900 and Black Scholes Careful attention to the impact of dividends in analytical American option pricing Dimensional analysis and the adequation formula relating FX call and FX put prices through transformed Black Scholes formulae Intuitive review of risk neutral pricing probabilities and how and why these are related to physical pricing probabilities Careful distinction between the early Merton non risk neutral hedging type argument and later Cox Ross Harrison Kreps risk neutral pricing Simple discussion of Monte Carlo methods in science and option pricing Simple interpretations of the Black Scholes formula and PDE and implications for trading Careful discussion of conditional probabilities as they relate to Black Scholes Intuitive treatment of high level topics e g bond numeraire interpretation of Black Scholes where $N(d_2)$ is P ITM versus the stock numeraire interpretation where $N(d_1)$ is P ITM
