grow easily and produce more because the force it takes for the roots to wheedle out nutrients in the soil goes instead on vegetative growth and bearing fruit or flowers Thus it s more effective as a means of production Because the growing medium is inert you can control the nutrients that the plant receives by adjusting the pH levels and strength of the nutrient solutions You also manage the feeding and watering cycles With technology the potential to have a high tech hydro system is not impossible All aspects of this type of gardening are therefore easy automated and controlled The only limit is your budget and your imagination With hydroponics people can be confident that food that they will always have food available and that the crops will be easy to produce Crops can be cultivated even in places with non arable land Hydroponics ensures that the plants or crops get the needed nutrients to grow well Are you ready to know more Now buy your copy **American Horticulturist** ,1996 Home Hydroponics ... and how to Do It!
