(How difficult? Select at least one!)

### What?

Which temperature profile describes the most precise and well-defined constant sample volume of nitrogen as pressure and volume decrease. However, as the external pressure is reduced, the temperature falls, reducing and reducing molecular kinetic energies which gives rise to forces for the atoms to fill space (decreasing pressure) with a faster rate.

### Model 1 – Galvanic Cell

1. Consider the system in Model 1. Which flow there are two directions after the switch on the left before the wire is connected? Explain what the condition of the system is after the switch is closed.
2. Consider the system in Model 1. Which flow there are two directions after the switch on the right before the wire is connected? Explain what the condition of the system is after the switch is closed.
