**Beowulf** Burton Raffel,1963      **Beowulf** ,1963      **Beowulf** Burton Raffel,2012-01-01 Beowulf is the conventional title of an Old English heroic epic poem consisting of 3182 alliterative long lines set in Scandinavia commonly cited as one of the most important works of Anglo Saxon literature It survives in a single manuscript known as the Nowell Codex Its composition by an anonymous Anglo Saxon poet is dated between the 8th and the early 11th century      Beowulf ,1963      **Beowulf** ,1987-08-05 England of the Dark Ages both its literature and its history are mirrored in the epic of Beowulf The story of the mythical warrior prince Beowulf tells us much about England ca 500 1000 A D its people its neighbors and the conditions

**Translating Beowulf** Hugh Magennis,2011 Translations of the Old English poem Beowulf proliferate and their number continues to grow Focusing on the particularly rich period since 1950 this book presents a critical account of translations in English verse setting them in the contexts both of the larger story of recovery and reception of the poem and of perceptions of it over the past two hundred years and of key issues in translation theory Attention is also paid to prose translation and the the creative adaptations of the poem that have been produced in a variety of media not least film The author looks in particular at four translations of arguably the most literary and historical importance those by Edwin Morgan 1952 Burton Raffel 1963 Michael Alexander 1973 and Seamus Heaney 1999 But from an earlier period he also gives a full account of William Morris s 1895 version      **Translators on Translation** Kelly Washbourne,2024-12-13 This is a book in pursuit of translators philosophies or personal theories of translation From Vladimir Nabokov and William Carlos Williams to Ursula K Le Guin and Langston Hughes Translators on Translation coaxes each subject s reflections on their art their particular view of translation and how they carry out their specific form of translation The translators intellectual biographies expand our understanding of their views often in their own words on the aesthetic political and philosophical nature of translation lend insight into their translation decision making on specific works afford critical summaries and contextualizations of their key theoretical and theoretico practical works unearth their figurative conceptualizations of translation and construct their subject identities As a person s body of work can be diffuse scattered fragmentary and contradictory inner lives have to be constructed and reconstructed Through a recovery and narrativizing of their writing and speaking on translation their interviews paratextual commentary letters lecture notes and even fiction and poetry these late twentieth century subjects answer the question What is translation to you The book is supported by additional translators profiles and selected translations on the Routledge Translation Studies portal Translators on Translation is key reading for courses on translation practice translation history translation theory and creative writing courses that engage in translation while also being vital reading for practicing literary translators      Translation Mildred L. Larson,1991-01-01 This book is a collection of articles which highlight the fact that good translation theory is based on information gained from practice At the same time good practice is based on carefully worked out theory The two are interdependent The authors who have contributed are persons

who know the importance of both theory and practice and the tension between the two They are not only translators but also have long experience in training others The articles cover a wide variety of topics grouped in five sections The first presents four graphic descriptions of what happens when one translates The second looks at aspects of the application of theory from the backgrounds of European and Asian translation practices The third has excellent articles which apply theory to the fields of poetry opera drama and humor The fourth section provides four ways of putting theory into practice The fifth gives language specific examples and the last section deals with the application of theory and practice to teaching in an academic context

**A Bibliography of Publications on Old English Literature to the End of 1972** Stanley B. Greenfield, Fred C. Robinson, 2008-07-28 Greenfield and Robinson state in their preface that they have sought to include every book monograph article note and review published on Old English literature since the invention of printing They have come as close to doing so as two descendants of Adam possibly can undeterred by the trouble at Babel By my count thirty different languages are represented in the bibliography sixteen of them frequently Rarely has any bibliography in any other discipline equalled the thoroughness and accuracy of this one It is a contribution for which Greenfield and Robinson will long receive from their colleagues that measure of gratitude reserved for Old English scholarship s most bounteous treasure givers Carl T Berkhout What astonishes is how well Greenfield and Robinson have succeeded in what they set out to do how uniformly excellent their volume is in all its profusion of information and detail The Bibliography will bring scholars that peculiar joy in complex intellectual work done well that only they know it will be immensely useful virtually indispensable if not a *vade mecum* because of its size then at least an *enchiridion* with which they will fight their battles on behalf of Beowulf and Brunanburh and the Blickling Homilies The Old English Newsletter A volume long needed the Bibliography will now become an indispensable reference work for every student of Old English literature from the beginner to the acknowledged authority British Book News

**The Craft of Translation** John Biguenet, Rainer Schulte, 1989-08-15 These essays offer insights into the understanding and craft of translation The contributors not only describe the complexity of translating literature but also suggest the implications of the act of translation for critics scholars teachers and students The demands of translation according to these writers require both comprehensive scholarship in preparing to translate a text and broad creativity in recreating the text in a new language Translation thus becomes a model for the most exacting reading and the most serious scholarship Some of the contributors lay bare the rigorous methods of literary translation in comparisons of various translations of the same piece some discuss the problems of translating a specific passage others speak about the lessons learned over the course of a career in translation As these essays make clear translators work in the space between languages and in so doing provide insights into the ways in which a culture makes the world verbal From publisher s description

**The Oxford Guide to Literature in English Translation** Peter France, 2000 This guide highlights the place of translation in our culture encouraging awareness of the process of translating and the choices involved making the translator

more visible Concentrating on major writers and works it covers translations out of many languages from Greek to Hungarian Korean to Turkish For some works e g Virgil s Aeneid which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available      Poems from the Old English ,1960      Language in Literature Jonathan Locke Hart,2024-10-15

Language in Literature examines the overlap and blurring boundaries of English comparative and world poetry and literature Questions of language literature translation and creative writing are addressed as befitting an author who is a poet literary scholar and historian The book begins with metaphor which Aristotle thought in Poetics was the key gift of the poet and discusses it in theory and practice it moves from the identity of metaphor to identity in translation and culture it examines poetry in a comparative and world context it looks at image and text it explores literature and culture in the Cold War it explores the role of the poet and scholar in translating poetry East and West it places creative writing in theory and practice in context East and West it concludes by summing up and suggesting implications of creation in language translating and interpreting and its expression in literature especially in poetry      **The Art of Translating Poetry** Burton Raffel,1988-01-01 This book by a well known translator and critic is divided into two parts the first dealing with the linguistic and other more technical aspects of translating poetry the second involved with more practice oriented matters The chapters in Part One examine the specific constraints of language and the unavoidable linguistic bases of translation the constraints of specific languages forms and genres and prosody and comparative prosody Part Two looks at the subjective element in translation collaborative translation the translation of oral poetry and the translator s responsibility Languages discussed include Indonesian Japanese Chinese Old and Middle English French German Spanish Italian Persian Russian Latin and Greek The book argues inter alia that literal translation is impossible that no translation can fully create the original but that good literary translation can create a usable approximation that translation is secondary not only to the original work being translated but also to the linguistic and literary nature of the language being translated into that the literary translator s primary responsibility is to the work he is translating that there is nothing ever definitive about any translation that the poetry translator must be a poet and poems should not be translated into prose and that there must be a subjective identification between translator and translated work This is the first attempt to systematize linguistic information about the translation of poetry It is also the first book to range widely over the languages and literatures of the past and the present and European and Asian languages and literatures as well Raffel is the first author to combine in one study linguistic and scholarly knowledge and extensive experience of translation      Glencoe Literature, Grade 12, Interactive Reading Workbook McGraw-Hill Education,2002-05-10 The Interactive Reading Workbook provides two guided learning opportunities per selection for students to practice word study vocabulary spelling comprehension and critical thinking skills as they read
