Intersections of AI and the Freedom of Religion or Belief Chakraborty, Swati, 2025-11-21 With the growing spread of AI in many fields the intersection of religion and AI questions ethics human rights and cultural domains As systems increasingly influence information access and decision making their deployment can either support or threaten religious freedom Exploring this intersection involves examining how algorithmic biases data governance and digital policies impact religious expression and belief systems Understanding these dynamics is essential for ensuring that AI technologies are developed and applied in

ways that uphold fundamental rights and respect diverse worldviews

Intersections of AI and the Freedom of Religion or Belief explores how AI has become a powerful force in shaping societies and how it raises significant ethical legal and human rights concerns particularly around the right to freedom of religion or belief This book sheds light on both the risks and the opportunities Covering topics such as AI religion and deep learning applications this book is an excellent resource for scholars technologists policymakers and faith based organizations

Navigating Social Trust in the AI Era Samanta, Debabrata, 2025-12-04 As artificial intelligence AI is integrated in everyday life from decision making algorithms in healthcare and finance to generative tools in media and education the question of social trust emerges Trust in AI systems extends beyond technical performance encompassing ethical design transparency accountability and the perceived intentions of those utilizing the technology In this evolving landscape individuals and societies must grapple with concerns around data privacy algorithmic bias and the erosion of human agency Navigating social trust in the AI era requires an approach that combines responsible innovation inclusive governance and public engagement to ensure AI serves public interest rather than worsening existing inequalities Navigating Social Trust in the AI Era explores the ethical legal and social implications of AI with an emphasis on privacy issues and regulatory developments It examines the intersection of new AI technologies personal data social trust and governance structures while providing both theoretical perspectives and practical examples This book covers topics such as data science ethics and law and accounting and finance and is a useful resource for sociologists computer engineers policymakers academicians researchers and data scientists

Honestly Biased Janu Goswami, 2025-10-15 Bias is one of the most persistent forces shaping human life It appears in the most intimate spaces of family silently influencing how children are raised and how relationships evolve It emerges in professional environments deciding who gets opportunities and whose voices are ignored It shapes first impressions when strangers meet reinforces cycles of poverty hides within technological systems and is woven into cultural traditions that dictate what is considered normal or acceptable Though often invisible bias quietly directs human decisions relationships and structures of power This book is an exploration of these biases in their many forms It does not simply describe prejudice as an abstract concept but traces its presence across the everyday realities of modern life From the home to the workplace from society's treatment of the poor to the coded instructions of algorithms from personal encounters to global cultural exchanges the book shows how bias operates how it divides and how it can be challenged Blending analytical insight with philosophical reflection the book offers both a critique of the systems that perpetuate injustice and a hopeful vision of what is possible when awareness leads to transformation It invites readers to confront uncomfortable truths but also to imagine new ways of living that expand fairness empathy and dignity Ultimately this is not only a study of bias but a call to courage It reminds us that while bias may be a universal part of the human condition it does not need to define our destiny With awareness persistence and compassion humanity can reshape its future one choice one relationship one act of justice at a time

AI in Social Studies Education

Christopher H. Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions Between utopian visions and apocalyptic predictions of AI's impact on education there is a need to thoughtfully consider what education in the age of AI can and should look like This volume focuses on the implications of AI technology for teachers in K 12 and university settings providing a careful look at its affordances and drawbacks for social studies curriculum and teaching Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI This book fills a critical need especially among educators to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno utopianism Whether skeptical or enthusiastic about AI every social studies educator will find something useful to their practice in this book
