This book presents a kaleidoscopic view of the multidisciplinary field of research developed within Brazilian social sciences to study football as a major cultural and social phenomenon in the country. As a contributed volume, it brings together chapters authored by researchers from different disciplines such as sociology, anthropology, political science, history, geography, economy, communication studies, and physical education, who contributed to make Brazilian football a multifaceted object of study for the human and social sciences. The book is divided into four parts. The first two parts are dedicated to the classic areas in which the best known research lines are concentrated: part one focuses on politics and history, while part two is dedicated to sociology and anthropology. The third part brings together studies from other four different areas: communication studies, geography, economy, and physical education. The fourth part is organized not by disciplines but around transversal themes such as gender, violence, fans, and racism. The varied approaches and different interpretations brought together in this book seek to provide an overview of the fertile academic debate that has stimulated the renewal of scientific research on football in Brazil, which makes *Football and Social Sciences in Brazil* a useful resource for researchers from different disciplines within the human and social sciences interested in the study of football as a major cultural and social phenomenon all over the world.

Digital Food Tania Lewis, 2020-02-20 Tania Lewis offers the first critical account of the impact of digital information media and communication technologies on the topic of food. Lewis critically analyzes how our relationship to food consumption, production, and politics is being re-mediated through digitally connected electronic devices, practices, and content. By drawing together the world of food and the digital, the book speaks to a number of pressing contemporary themes, including the tensions around digital engagement in increasingly commercialized spaces, the changing nature of politics in a social media context, the growing naturalization of digital devices and related practices of data monitoring, and the role and impact of digitization on social relations. At the forefront of critical new research and written with a student readership in mind, this text is essential for scholars interested in media studies, cultural studies, food studies, and cultural geography.
