How AI Thinks Nigel Toon, 2024-02-08 THE 2 TIMES BESTSELLER Artificial intelligence is going to have a massive impact on everyone's lives an accessible and sensible read that helps demystify AI Deborah Meaden entrepreneur and star of Dragon's Den Nigel Toon is a visionary leader in the field of artificial intelligence a must read Marc Tremblay Distinguished Engineer Microsoft Those who understand how AI thinks are about to win big We are used to thinking of computers as being a step up from calculators very good at storing information and maybe even at playing a logical game like chess But up to now they haven't been able to think in ways that are intuitive or respond to questions as a human might All that has changed dramatically in the past few years Our search engines are becoming answer engines Artificial intelligence is already revolutionising sectors from education to healthcare to the creative arts But how does an AI understand sentiment or context How does it play and win games that have an almost infinite number of moves And how can we work with AI to produce insights and innovations that are beyond human capacity from writing code in an instant to unfolding the elaborate 3D puzzles of proteins We stand at the brink of a historic change that will disrupt society and at the same time create enormous opportunities for those who understand how AI thinks Nigel Toon shows how we train AI to train itself so that it can paint images that have never existed before or converse in any language In doing so he reveals the strange and fascinating ways that humans think too as we learn how to live in a world shared by machine intelligences of our own creation

Beyond the Black Swan Rika Nakazawa, 2024-01-31 Of course anyone would want to wake up from a really bad dream especially one that seemed like it may never end while successively stripping away joys and conveniences of our modern living The COVID 19 pandemic bestowed on us a collective nightmare experience of varying intensity akin to a Black Swan event as author and mathematical philosopher Nassim Taleb might describe given its

universal rarity and devastating effects and seeming predictability in hindsight However we may remember this remarkable time in our history rather as a White Swan event one that catalyzed a more common occurrence of evolving Environmental Social and Governance ESG principles a mainstreaming of sustainability fueled by the digital innovations that designed ways to survive and thrive into a new and more holistic world order Now as we emerge from the remnants of the pandemic s aftermath we find ourselves at the late dawn of a new geologic epoch the Anthropocene where the impact of humans on the planet s geology and ecosystems looms so monumentally that the gravest threat to our existence stems from our own actions Contained within these pages you will discover insights from leaders across diverse domains community industry public administration and the investment community Through their own experiences we unfurl White Swan sightings moments when sustainability flourished in response to reverberations of the COVID 19 virus More poignantly the journey ahead carries us beyond the realm of the Black Swan while the acceleration of digital innovations equips us to herald a new era out of the Anthropocene and into a new one with sustainability innovations as a critical placemat The humanistic seismic shifts caused by the Pandemic will generate a future of holistic interoperability between digital and organic matters We are on the brink of designing unprecedented harmony with each other and equilibrium of regenerative growth with the world around us The urgency has never been greater nor the possibilities so profound
