It offers simple, clear strategies to make your lessons more engaging, reduce your workload, and give students more personalized learning without replacing the human touch that makes teaching meaningful. You'll learn how to use AI tools to support students outside class, automate tasks like grading and feedback, and create lessons that match each student's level. From writing help to speaking practice, lesson planning to gamified learning, this book shows how AI can make your job easier and your classroom more exciting. It also addresses real concerns like feeling unsure about AI or wondering how to use it responsibly. With ready-to-use ideas, lesson plans, and an easy action plan, this book will help you feel more confident using AI while keeping students at the heart of your teaching.

**Teaching Reading to American Indian/Alaska Native Students** Jon Reyhner, 2001      **Ai-Enhanced Literacy** Mary Ehrenworth, Philip Seyfried, 2025 Teach students to use AI tools in a thoughtful, critical, and ethical way during reading and writing instruction. The relationship between AI and literacy education isn't simple. Every tool that makes work more efficient also requires careful consideration. In this measured look at the powerful capabilities of artificial intelligence, literacy experts Mary Ehrenworth and Philip Seyfried take K-12 teachers on a tour of what's possible when AI tools are seamlessly integrated into literacy teaching and learning. Each chapter examines AI's potential to expand literacy instruction, deepen student understanding, and make the teacher's role more interesting and satisfying. You'll find both theoretical approaches and practical examples to help you understand and feel at ease with current AI tools. Create AI-enhanced spaces in your classroom. Harness AI as a writing coach. Develop students' reading comprehension with digital texts and tools. Extend multilingual competencies using AI-powered translation tools. Build and use engaging text sets. Teach students to think critically about and with AI. Using AI tools to improve reading and writing instruction can feel overwhelming, but it is a critical skill for today's literacy teachers. AI-Enhanced Literacy illuminates a strategic and successful path toward wise and seamless AI use, your own and your students'. *Productive, Not Polarizing* Heather Kenyon Casey, This book, co-published with the National Science Teaching Association (NSTA), provides the support that K-12 teachers and students need for more complex science investigations. Drawing on research that informs effective literacy practices, this book pushes back on singular ideologies, programs, and divisive rhetoric and instead embraces an inclusive perspective for supporting literacy development and learning. Readers are encouraged to move beyond debates that divide us and look toward the hard but necessary work of building the partnerships needed to support all students. *Productive, Not Polarizing* begins with a focus on community literacies and then describes effective literacy practices across grade levels. Designed for a wide audience, it will assist educators, families, and community partners to have informed conversations about what literacy instruction and learning involves. Every chapter includes a Community Snapshot describing a real-life scenario in which a partnering benefits students.

*The Digital Future of English* Simone Murray,2025-07-18 More than any other academic discipline literary studies is the creation of print culture How then can it thrive in the digital era Early 1990s predictions of the book s imminent demise presented a simplistic either or choice between the legacy of moribund print and triumphalist digital technology Yet we have grown to experience the two media as complexly interdependent and even complementary Clearly digital does not kill print But literary studies in the digital era cannot simply resume business as usual It is urgently necessary to reconsider the discipline s founding assumptions in light of digital technology The digital era prompts a rethinking of literary studies object of study as well as its methods theories audiences and pedagogical practices

What counts as literature necessarily shifts in an age of proliferating born digital texts and do it yourself DIY online publication Where should literary studies sit institutionally and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book loving publics has never been technologically easier Finally how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial age students Literary studies has been convulsed for decades by debates over electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology s impact on the underpinning tenets of the discipline Literary Media Studies is pitched at fellow literary scholars book historians media theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies digital future Teaching Reading to Children with Special Needs Patricia H.
