The Wilberforce Option JJ Van Wyk,2016-01-29 Houston we have a problem Spaceship Earth is in trouble but most of those traveling first class dont believe there is a problem And the other passengers are either oblivious confused or at odds with one another about what the problem actually is and what if anything can be done about it The dominant species on planet Earth Homo sapiens continues to eliminate other species and

to gravely perhaps irreversibly damage the natural environment There are also too many humans who prey on others of their own species There are many concerned individuals and institutions such as Thomas Piketty Chrystia Freeland and Oxfam who have written about the problem from different perspectives and providing different views contributing to my observations and insights What has been conspicuous in its absence is a feasible and desirable solution to the apparently intractable predicament in which the global community finds itself That is my unique contribution with this book My solution is comprehensive conceived for the new millennium redefining money in a fundamentally new financial system fostering a collaborative economic doctrine that optimises the production of utility and a truly democratic political system that will provide good governance in the best interest of the people at last I also provide a peaceful civilised road map for getting there within the laws of the day My aim is to prevent the destructive revolution that may have already begun My suggestion is that we begin in the USA The war on poverty will unite the United States as never before across all the lines and labels that currently divides it This war to end all wars will soon extend globally America will again lead the world but this time without moral ambiguity with total moral clarity

Economic Shocks and Globalisation Elsabé Loots, 2024-08-01 Over the 153 year period since 1870 the phenomenon of globalisation has been shaped and reshaped As we look back at the events that shaped our understanding of the process and its momentum before and after the Global Financial Crisis GFC it became clear that the process of globalisation has changed and continues to evolve which requires a deeper analysis The book answers the question of why the performance of the hyper globalisation period has not continued during the post GFC period after 2010 and what might be expected going forward Apart from the fact that the fourth globalisation wave period between 2010 to the early 2020s has been characterised by a range of global shocks that caused more volatility instability and uncertainty the major economic determinants of globalisation have also slowed markedly The outbreak of the COVID 19 pandemic followed by the geopolitical uncertainty and instability all caused global contagion effects around the world with economic socio economic

and geopolitical consequences and responses This book aims to analyse most of these global events and shocks and attempted to gather a deeper understanding of the present drivers of globalisation and what the major trends and shifts are geo economically socio economically and geopolitically The conclusions drawn include that globalisation remains despite the current slowbalisation an integrated process that is globally entrenched yet complex cyclical multifaceted and multiplex This book is aimed at academics in economics political sciences social sciences and may also find an audience among international policymakers and scholars at multilateral institutions such as the World Bank and the United Nations The Russia Scare

Richard Sakwa, 2022-07-08 The Russia Scare assesses the scope character and extent of Russian interference in the affairs of liberal democratic states This book examines the Russia scare in a dynamic manner stressing the interaction between threat perception responses and subsequent policies What forms did this threat take what were the instruments used how effective were the deployed tools and who were the allies with whom Russia worked in these endeavours Above all what impact did interference have on target societies The book explores why Russia engaged in such activities what the probable chain of command was if any and the role of the Russian leadership in all of this as well as investigating the response of Western societies and governments The author sifts the real from the imagined which can only be achieved by establishing the larger historical context He scrutinises the fundamental question was Russia before the invasion of Ukraine in 2022 really engaged in a sustained hybrid warfare campaign to sow discord and undermine Western democracies If so what were the strategic purposes underlying such an activity Various hypotheses are analysed notably that Russian post Cold War activity is nothing exceptional in the context of great power confrontation that all great powers are engaged in one way or another in such actions and thus contextualisation is important and that Russia's subversive activity was often exaggerated even misrepresented Responses potentially amplified the elements of subversion represented by the original threat Threats exist but responses always need to be calibrated so as not to inflict self harm on the integrity of liberal democracy itself This book will be of great interest to students scholars and academics of international relations comparative politics security and defence studies global governance and Russian politics as well as politicians political advisers NGOs diplomats and journalists

Resurgent Julian Birkinshaw, John Fallon, 2025-07-17 A practical handbook examining how established businesses can use their unique advantages to fight back and win in a digital arena too often dominated by tech start ups disruptors and unicorns The big tech companies Alphabet Amazon Apple Meta Microsoft have had an enormous impact on our everyday lives A new wave of start ups in the tech sector has dominated the press and swallowed up huge amounts of investment But what about those established companies in the traditional parts of the world's economies from energy industrial and consumer goods to travel and health They rarely got a mention Everyone was talking about the disrupters the start ups and the entrepreneurs and not about the incumbents This book is a call for a reality check For at the core of our established companies are capabilities and qualities that remain highly relevant in the digital age They are often market

leaders for very good reasons they know their customers and markets well and they have great product sales and marketing expertise They are operationally savvy and financially strong with deep insights into areas of expertise that no one else has giving them a unique advantage John Fallon and Julian Birkinshaw have come to a clear conclusion incumbents are not going quietly into that dark night Organizations will need to jettison their analogue baggage and infrastructure and embrace digital transformation They will survive and they will prosper And this shows how they are doing it *Lumber Trade Journal* ,1920
