**Education. Teacher Engagement with Minecraft Education Edition** Natasha Shroff, 2020-01-08 Bachelor Thesis from the year 2018 in the subject Didactics Business economics Economic Pedagogy grade 8 6 10 language English abstract With the fast paced change of society a transformation of education is vital in preparing today s students for tomorrow s challenges such as a technology based labor market A concept named 21st century learning has been developed by various stakeholders to frame the new type of skills required to succeed in the changing business environment In this study an investigation into primary school teacher engagement with emerging educational technology has been carried out in the case of Minecraft Education Edition a game based emerging educational technology The game was selected because it facilitates the learning of 21st century skills and hence provided a suitable choice to test various teacher technology engagement factors on a global scale 21st century skills were found to focus on students knowledge adaption and application rather than the traditional teaching based on knowledge acquisition and assimilation Concepts are based on a variety of skills such as basic ICT skills media literacy to support critical thinking in terms of data and conscious decision making informational computational thinking as well as the social and emotional learning aspect The latter being a critical component for graduates to thrive and collaborate in a continuously adapting environment This digital and cultural transformation requires students to take more responsibility ownership and agency over their learning Hence time and place independent student centered and flexible learning are encouraged through 21st century education With the transformation of education new skill

requirements for teachers were found to be essential for a 21st century skill transfer in primary schools. Such requirements include high levels of teacher agency, basic digital skills, and pedagogical/technological integration competences to take responsibility for the EdTech integration. To apply technology effectively, teachers are recommended to build their ICT self-efficacy, their own beliefs in their digital skills, on a continuous professional learning journey. To increase the latter engagement component, measures such as sharing expertise and experiences in a global teacher community, as well as proactively seeking increased collaboration with teachers and students, are recommended.

**METHODS OF TEACHING APPLYING COGNITIVE SCIENCE TO PROMOTE STUDENT LEARNING** helps prospective teachers learn how to apply recent findings by cognitive scientists to their classroom practices in order to promote true conceptual change among their students. The book focuses squarely on ways to bring about deep rather than surface learning to all students. The authors use and model many of the teaching strategies they present, focusing on major core concepts and utilizing a rich array of pedagogical features to help prospective teachers build a deep understanding of how people learn and what strategies they can use as teachers to help their students achieve long-lasting comprehension. Throughout the text, the authors emphasize the need to change instruction in light of new findings from cognitive science. Planning for instruction, behavior management, and technology are integrated into each chapter.
