Presenteeism in the Aftermath of COVID-19: New Trends and Contributions Regarding Sickness Presence at Work Aristides I. Ferreira, Luis F. Martinez, Merce Mach, Mariella Miraglia, 2022-05-03

Remote Working Alan Felstead, 2022-01-20 The coronavirus pandemic forced work back into the home on a massive scale The long held belief that work and home are separate spheres of economic life was turned on its head overnight Many employees were new to this way of working and many employers had to manage a disparate workforce for the first time This book reviews what impact this shift had on the lives of millions of employees the organisations which employ them and the societies in which they live It also looks to a future in which more work is carried out remotely at home in the local caf restaurant or bar or while moving from place to place The book synthesises the existing evidence in an accessible and easy to read way It will appeal to all those who want a quick and concise introduction to the major themes associated with remote and hybrid working This will include teachers lecturers students academics and policy makers as well as those who have experienced the challenges and benefits of homeworking first hand

Radically Human Paul Daugherty, H. James Wilson, 2022-04-26 Technology advances are making tech more human This changes everything you thought you knew about innovation and strategy In their groundbreaking book Human Machine Accenture technology leaders Paul R Daugherty and H James Wilson showed how leading organizations use the power of human machine collaboration to transform their processes and their bottom lines Now as new AI powered technologies like the metaverse natural language processing and digital twins begin to rapidly impact both life and work those companies and other pioneers across industries are tipping the balance even more strikingly toward the human side with technology led strategy that is reshaping the very nature of innovation In Radically Human Daugherty and Wilson show this profound shift fast forwarded by the pandemic toward more human and more humane technology Artificial intelligence is becoming less artificial and more intelligent Instead of data hungry approaches to AI innovators are pursuing data efficient approaches that enable machines to learn as humans do

Instead of replacing workers with machines they're unleashing human expertise to create human centered AI. In place of lumbering legacy IT systems they're building cloud first IT architectures able to continuously adapt to a world of billions of connected devices. And they're pursuing strategies that will take their place alongside classic winning business formulas like disruptive innovation. These against the grain approaches to the basic building blocks of business Intelligence Data Expertise Architecture and Strategy IDEAS are transforming competition. Industrial giants and startups alike are drawing on this radically human IDEAS framework to create new business models optimize post pandemic approaches to work and talent rebuild trust with their stakeholders and show the way toward a sustainable future. With compelling insights and fresh examples from a variety of industries Radically Human will forever change the way you think about practice and win with innovation.

Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien,2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany s 100% remote job market In a fast changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively On the one hand the pandemic forced German

companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap.

Remote working as a sub trend of the mega trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers as external workers, reducing costs due to fewer offices, being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cybersecurity. When everything's going remotely, companies have become an easier target of cyber attacks.
