Proceedings of International Conference on Recent Innovations in

Computing Yashwant Singh, Paulo J. Sequeira Gonçalves, Pradeep Kumar Singh, Maheshkumar H. Kolekar, 2024-11-28 This book features selected papers presented at the 6th International Conference on Recent Innovations in Computing ICRIC 2023 held on 26-27 October 2023 at the Central University of Jammu India and organized by the university's Department of Computer Science and Information Technology. The book is divided into two volumes and it includes the latest research in the areas of software engineering, cloud computing, computer networks and Internet technologies, artificial intelligence, information security, database and distributed computing and digital India. [Chatgpt and Other Generative AI Tools](#) Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years, applications of generative artificial intelligence (GAI) have found rapidly growing use in medicine, science and daily life. Large language models (LLMs) opened up new avenues in particular for education. LLMs have been used to create interactive educational content for students, stimulate their curiosity, generate code explanations and develop assessment questions. Additionally, LLMs have been applied for language practice, anxiety alleviation and feedback provision. In higher education, LLMs have shown potential for assisting in medical exam preparation and clinical decision making. In school education, LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback. More recently, LLM-based applications such as ChatGPT have been used to generate teaching materials or assessment tasks across different subjects. The fields' understanding of the effects of the use of LLM-based applications in classroom teaching, however, is still in its infancy. GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers' efforts to generate content. However, it is critical that teachers and students do not overly rely on GAI-generated solutions but instead critically assess each solution. Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies. **Affiliate Marketing Reloaded** Ryan T. Maddox, 2025-11-04 Are you tired of chasing affiliate trends that don't convert or worse burn out your time and energy with zero results? Affiliate Marketing Reloaded is your no-hype, smart strategy guide to building reliable, scalable passive income through affiliate marketing without needing a big audience, tech skills or paid ads to start. Whether you're a beginner or restarting from scratch, this book delivers a practical blueprint that aligns with today's algorithm-driven platforms and content economy. Inside you'll learn how to: Choose a profitable niche that balances passion, problem-solving and demand; Identify high-converting affiliate products that sell on autopilot; Join top affiliate networks like Amazon, ClickBank, ShareASale and more; Build a simple, effective funnel that earns while you sleep; no blog needed; Create content that ranks, converts and grows trust even if you're not a writer; Leverage free traffic from YouTube, TikTok, Pinterest, Reddit and Quora; Automate emails, repurpose content and scale with smart AI tools; Avoid platform bans, burnout and common rookie mistakes that sabotage success. What sets this book apart? It's grounded in real-world case studies, ethical marketing practices and a less-hustle, more-strategy approach to online income. The Future of Language Philip Seargeant, 2023-11-02 Will language as we know it cease to exist? What could this mean for the way we live our lives? Shining a light on the technology currently being developed to revolutionise communication, *The Future of Language* distinguishes myth from reality and superstition from scientifically based prediction as it plots out the importance of language and raises questions about its future. From the rise of artificial intelligence and speaking robots to brain implants and computer facilitated telepathy, language and communications expert Philip Seargeant surveys the development of new digital languages such as emojis, animated gifs and memes, and investigates how conventions of spoken and written language are being modified by new trends in communication. From George Orwell's fictional predictions in *Nineteen Eighty Four* to the very real warnings of climate activist Greta Thunberg, Seargeant explores language through time, traversing politics, religion, philosophy, literature, and of course technology in the process. Tracing how previous eras have imagined the future of language from the Bible to the works of H.G. Wells and from *Star Wars* to *Star Trek*, the book reveals how perfecting language and communication has always been a vital component of utopian dreams of the future. Questioning the potential ramifications of recent and future developments in communication on society and its ideals, *The Future of Language* is a no-holds-barred investigation into the state of civilisation and the impact that changes in language could have on our lives. *Pacific Rural Press*, 1893 [School Library Journal](#), 2008 [Forthcoming Books](#) Rose Army, 1998

AI for Teachers MAYA. HART, 2025-09-23 Feeling overwhelmed by endless lesson planning, grading, piles of assignments, and trying to keep students engaged in a world that changes faster than you can keep up? You're not alone. Teachers today work an average of 50 hours a week, and studies show nearly 40% of that time is spent on administrative tasks instead of teaching. At the same time, AI is reshaping every industry, with experts warning that by 2030 up to 800 million jobs worldwide could be impacted by automation, including education. If this sounds alarming, here's the good news: AI will not replace teachers, but teachers who know how to use AI to save time will replace those who don't. This book shows you exactly how to stay ahead of the curve while saving hours every week and reigniting your passion for teaching. *AI for Teachers: Save Hours, Engage Students, and Stay Ahead* offers a clear, empowering path for educators who want to thrive in the AI era. It combines simple explanations, classroom-ready strategies, and step-by-step AI integration in teaching so you can work smarter, engage learners more deeply, and reclaim your time. Inside, you will discover AI tools for lesson planning and feedback that save you hours every week; personalization strategies to create personalized learning paths using AI; engagement boosters with AI-driven activities such as gamified lessons, interactive discussions, and creative projects; time-saving automation for emails, scheduling, and parent-teacher communication so you can focus on students; real classroom examples of teachers who used AI for teacher workflow automation to improve student outcomes and reduce burnout; what this book solves; shows you how to automate grading and feedback for teachers so you eliminate hours of repetitive work; helps you integrate practical AI
