New Mentalities of Government in China David Bray, Elaine Jeffreys, 2016-01-13 China continues to transform apace flowing from the forces of deregulation privatization and globalization unleashed by economic reforms which began in late 1978 The dramatic scope of economic change in China is

often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party CCP rule. However, the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government including how authorities and citizens interact in the management of daily life.

New Mentalities of Government in China examines how the privatization and professionalization of public service provision is transforming the nature of government and everyday life in the People's Republic of China (PRC). The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of new mentalities of government in China. Its chapters focus on areas such as clinical trials, conceptualizing government, consumer activity, elite philanthropy, lifestyle and beauty advice, public health, social work, volunteering and urban and rural planning. Offering a topical examination of shifting modes of governance in contemporary China, this book will appeal to scholars in the fields of anthropology, history, politics and sociology.
