Section Two: Branding Fundamentals

Understanding some basics of branding history, both ancient and recent, will give us perspective on branding design today.

Section Three: Core Principles: Generating Concepts

Better identities are created from a position of wealth of concepts rather than just one or two concepts. A proven method to develop more and better corporate identity concepts.

Section Four: Core Principles: Seven Deadly Sins of Logo Design

Several common approaches to identity design prevent an identity from working in ways that every identity should be able to work.

Section Five: Core Principles: Visual Techniques

Any given concept can be executed in virtually endless ways. These techniques can transform a common concept into an uncommon or even remarkable final identity.

Section Six: Core Principles: Color

Section Seven: Core Principles: Typographic Spatial Issues

Even superior designs can be undermined by poor color, typographic or spatial choices, and how to prevent that.

Section Eight: Implementing Core Principles of Identity Design

Hundreds of current examples demonstrate the consequences of deviating from the Core Principles of Branding Design, plus the benefits of redesigning to abide by them.
