Postdigital (Re)Imaginations Petar Jandrić, Juha Suoranta, Marko Teräs, Hanna Davis, 2025-10-31 This edited volume presents the latest achievements of postdigital scholarship in the field of future studies Showing that current policy frameworks are dominated by capitalist imaginaries the book insists on the development of radically different futures This task is approached in five different ways The book begins with an overview of the many ways to approach postdigital imaginations as emancipatory practices followed by some urgent reimaginings of older ideas It moves on to critiques of current practices policies and imaginaries and develops postdigital research methods for the development of emancipatory educational imaginaries Showcasing some recent interventions in educational politics policy and practice it links presented work on postdigital imaginations with recent postdigital inquiry related to the geopolitics of postdigital educational development This book is suited for educators policy makers and any researcher fascinated by the unbounding of education from capitalist imaginaries and reframing it within an emancipatory future

Turning Data into Insight with Machine Learning for IBM z/OS Makenzie Manna, Abid Alam, Roger Bales, Vineet Dumir, Nicholas Kunze, Jia Li, Sunil Mishra, Evan Rivera, Meng Wan, and Yichong Yu, IBM Redbooks, 2025-08-06 The exponential growth in data over the last decade coupled with a drastic adoption of artificial intelligence has opened organizations up to valuable insights opportunities for improvements in efficiency increases in profits and overall deliver more business value both internally to employees and shareholders and externally to clients and consumers The data that fuels these insights is the foundation that these organizations must tap in to innovate and they must capitalize on the most advanced AI capabilities to stay ahead of the competition and they must do so in a secure environment that protects the data throughout its lifecycle and data access in real time at any time When it comes to security nothing can rival IBM Z the multi workload transactional platform that powers the core business processes of the majority of the Fortune 500 enterprises with unmatched security availability reliability and scalability With core transactions and data originating on IBM Z it simply makes sense for AI to exist and run on the same platform For years some businesses chose to move their sensitive data off IBM Z however the massive growth of digital data the punishing cost of security exposures as well as the unprecedented demand for instant actionable intelligence from data in real time have convinced them to rethink that decision and instead embrace the strategy of data gravity for AI Transaction gravity is the other force here which eludes to the trillions of transactions that move through IBM Z as it hosts some of the worlds most mission critical workloads that runs the global economy It is this dual strategy of data and transaction gravity that sets IBM Z apart For organizations to get real time business and operational insights at scale the AI workloads must be co located with the transactional applications and where the data originates IBM Z has made tremendous invests in this space starting at the hardware silicon level with the industry first Telum on chip AI inference accelerator introduced with IBM z16 all the way up the stack with our enterprise grade AI ML software offerings with a robust and

optimized open source ecosystem support Machine Learning for IBM z OS is one of IBM's flagship offerings that helps organizations deploy machine learning models on IBM z OS environments natively close to their most mission critical workloads and infuse them with AI. In the inherently secure Z environment your machine learning scoring services can co-exist with your transactional applications and data supporting high throughput and minimizing response time while delivering consistent service level agreements (SLAs). This book introduces Machine Learning for IBM z OS version 3.1.0 and describes its unique value proposition in addition to the business value of AI on the IBM Z platform. It provides guidance for you to get started with aligning your business goals and use cases for AI. It outlines the various patterns for accessing and consuming IBM Z data in on-premises, cloud, and hybrid environments. It discusses in detail the steps and best practices for model building, deployment, and inferencing and post-deployment monitoring. The book includes examples of how you can use the versatile and intuitive web user interface of MLz to quickly train, evaluate, and deploy a model. Through a batch job elapsed time prediction example, the book explores the value of MLz in such a use case and shows how to apply the batch job elapsed time model with MLz for application integration and provides insight into how MLz can be leveraged within machine learning operations to operationalize AI on IBM Z. Most importantly, it examines use cases across industries to illustrate how you can easily turn your massive data into valuable insights with Machine Learning for IBM z OS.

EYES AND SPECTACLE VAISAKH SUDHAKARAN, 2020-11-05. THIS STORY IS ABOUT TWO CIVILIZATIONS LIVING ON TWO DIFFERENT PLANETS WHICH HAS ITS OWN GLORY AND MISERY. EDN, 1986. **EDN, Electrical Design News**, 1987.

Deepfakes Nina Schick, 2020-08-25. Uncover everything you need to know about deepfakes and what could become the biggest information and communications meltdown in world history. In a world of deepfakes, it will soon be impossible to tell what is real and what isn't. As advances in artificial intelligence, video creation, and online trolling continue, deepfakes pose not only a real threat to democracy; they threaten to take voter manipulation to unprecedented new heights. This crisis of misinformation which we now face has since been dubbed the Infocalypse. In *DEEPFAKES*, investigative journalist Nina Schick uses her expertise from working in the field to reveal shocking examples of deepfakery and explain the dangerous political consequences of the Infocalypse both in terms of national security and what it means for public trust in politics. This all too timely book also unveils what this all means for us as individuals: how deepfakes will be used to intimidate and to silence for revenge and fraud, and just how truly unprepared governments and tech companies are for what's coming. *AI Expert*, 1986. **Journal A.**, 1987. *The Working Press of the Nation*, 2003. Profiles are provided for each company listed, and company rankings given under each industry. **Knowledge-based Systems for General Reference Work** John V. Richardson, 1995. By focusing on knowledge

based systems technology the primary purpose and goal of this book is to improve the quality of reference service rendered in libraries Within reference service this book examines question answering a complex and difficult task For those interested in the theoretical aspects of reference work they have to look no further than the first chapter In addition the book features theoretical chapters on modelling the reference transaction a chapter on the logic of ready reference work and a chapter on the appropriate criteria to apply in selecting an expert system shell Several practical chapters focus on what KBS work has already been done in the field and evaluate nearly fifty expert system development shells so that readers can select the most appropriate shell for their domain The subtitle of the book is applications problems and progress in regard to expert systems in reference work Applications are covered most clearly in chapter 8 which reviews the more than extant prototypes Chapter 3 covers what is feasible chapter 4 models the reference transaction and chapter 7 covers interface issues so that future applications can be more successful Problems are covered throughout the book starting with chapter 1 which discusses the traditional emphasis on reference sources It argues that the field needs to shift toward procedural knowledge related to work in reference departments The chapter on expert system feasibility reveals that there are alternative ways of conceptualizing the intellectual work of an expert and of course chapter 9 directly points out limitations in extant systems Encouraging words occur in chapter 1 about the shift to a balanced or complete paradigm for doing reference work Similarly the chapter on modelling is optimistic in that reference work can be modelled and systems implemented which act like human experts The final chapter tries to avoid the technological optimism inherent in many books on expert systems by identifying the near term factors which will influence the development of expert systems Key Features Historical background presenting the field s paradigmatic thinking Decision trees for basic formats of reference material Flowchart modelling the reference transaction Reviews of more than fifty extant KBS in general reference environments Evaluative criteria on more than forty expert system shells
