Topics in Expert System Design Giovanni Guida,Carlo Tasso,1989 Expert Systems are so far the most promising achievement of artificial intelligence research Decision making planning design control supervision and diagnosis are areas where they are showing great potential However the establishment of expert system technology and its actual industrial impact are still limited by the lack of a sound general and reliable design and construction methodology Freedom and Social Inclusion in a Connected World Yingqin Zheng,Pamela Abbott,Jose Antonio Robles-Flores,2022-11-19 This book constitutes the refereed proceedings of the 17th IFIP WG 9 4 International Conference on Social Implications of Computers in Developing Countries ICT4D 2022 which was supposed to be held in Lima Peru in May 2021 but was held virtually instead due to the COVID 19 pandemic The 40 revised full papers presented were carefully reviewed and selected from 58 submissions The papers present a wide range of perspectives and disciplines including but not limited to public administration entrepreneurship business administration information technology for development information management systems organization studies philosophy and management They are organized in the following topical sections digital platforms and gig economy education and health inclusion and participation and business innovation and data privacy

Resurgent Julian Birkinshaw,John Fallon,2025-07-17 A practical handbook examining how established businesses can use their unique advantages to fight back and win in a digital arena too often dominated by tech start ups disruptors and unicorns The big tech companies Alphabet Amazon Apple Meta Microsoft have had an enormous impact on our everyday lives A new wave of start ups in the tech sector has dominated the press and swallowed up huge amounts of investment But what about those established companies in the traditional parts of the world s economies from energy industrial and consumer goods to travel and health They rarely got a mention Everyone was talking about the disruptors the start ups and the entrepreneurs and not about the incumbents This book is a call for a reality check For at the core of our established companies are capabilities and qualities that remain highly relevant in the digital age They are often market leaders for very good reasons they know their customers and markets well and they have great product sales and marketing expertise They are operationally savvy and financially strong with deep insights into areas of expertise that no one else has giving them a unique advantage John Fallon and Julian Birkinshaw have come to a clear conclusion incumbents are not going quietly into that dark night Organizations will need to jettison their analogue baggage and infrastructure and embrace digital transformation They will survive and they will prosper And this shows how they are doing it *Proceedings from the First*
