multinational enterprises use shared service centers SSCs that centralize large parts of internal service functions. Developments such as digitalization, robotic process automation and the advent of generative AI, the COVID 19 pandemic, changes in society and the labor force, evolving capabilities and expectations of shared services have all contributed to significant changes in shared service strategies and operating models, service offerings and operations. Drawing on insights from a study in Malaysia, this volume contains insights on recent trends in shared services and Global Business Services (GBS) organizations in the areas of service delivery and operating model, the future of work, managing the workforce, optimizing process performance, automation, digitalization and AI.

Master The Art Of Colour Tash Bradley, 2025-04-10. The ultimate guide to using colour in your home by a leading interiors expert. As Director of Interior Design at the Lick paint brand and a colour psychologist, Tash Bradley wants you to feel like she's sitting at your kitchen table, guiding you to choose the colours that will both represent your style and have a positive impact on your space, whether you rent or own. Packed with practical tips and techniques from colour theory and colour schemes to creating a flow from room to room, colour drenching, feature walls and painted ceilings, this is the ultimate guide to decorating in style. Including case studies of some of Tash's favourite decorating projects, you can see her theory in practice, giving you a deeper understanding of how to make the right colour and styling choices. When it comes to designing a home, it's really important that you choose colours that you connect with. Master the Art of Colour will enable you to be creative and have fun and give you the power to transform your home your way.

Environmental Science: A Global Concern William Cunningham, Mary Ann Cunningham, 2009-09-18. Environmental Science: A Global Concern, Eleventh Edition, is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility and global awareness. This book is intended for use in a one or two semester course in environmental science, human ecology or environmental studies at the college or advanced placement high school level. We have updated data throughout the chapters in this book. Information and examples presented are the most recent available as of the mid 2009. You will find an abundance of specific numbers and current events details that are difficult to keep up to date in a textbook. The goal of this book is to provide an up to date introductory global view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles. Because most students who will use this book are freshman or sophomore non-science majors, the authors make the text readable and accessible without technical jargon or a presumption of prior science background.
