Ghosts in the Dating App Machine Gregory Narr, 2025-10-28 *Ghosts in the Dating App Machine* offers a critical examination of the shift to dating apps to illustrate key features of a broader shift to a mode of data colonialism based on datafication and AI orchestration. This book analyses 48 in depth and mediated interviews, forums, blogs, and official statements made by dating apps. It situates this transition within the broader culture of data colonialism through close readings of science fiction, suggesting the world has become like *Us* where doppelgangers constituted from reprehensible proclivities have emerged as digital profiles reflected back to users through the horrific play of social media mirrors to govern their encounters against their wishes. These mirrors allow media companies to conduct surreptitious experiments on users' dispossessed desires, devise digital doppelgangers from those they disavow, and compel behaviors that are lucrative precisely because they are misaligned with humane values. Yet this horrific play of mirrors is not inevitable. By attending to the ghosts of colonialism unleashed by media companies through the approach developed in this book, it is still possible to galvanize the collective will to combat data colonialism and strive to create a world where love disentangled from colonial modes of desire is possible. This study will interest scholars attempting to understand the rapidly evolving ecology of dating apps within the areas of digital media, media sociology, cultural studies, anthropology, and media and communication studies.

Design Beyond Limits with Figma Šimon Jůn, 2025-09-19 Become a pro Figma user by learning advanced techniques, real world workflows from experts, and AI tips that make collaboration and handoffs effortless. Key Features: Level up into a highly sought after designer through expert techniques and battle tested workflows. Learn faster with a hands on guide built around practical, recipe based approach. Put AI to work in Figma with workflows that speed up content assets and cleanup while saving hours. Purchase of the print or Kindle book includes a free PDF eBook. Book Description: Figma isn't just a design tool, it's the modern designer's command center. Šimon Jůn, COO at Dotidot, longtime Figma lecturer, and organizer of the Czech Friends of Figma community, built this book from the trenches of real product work. After years of untangling messy files, rescuing failing handoffs, and coaching teams at scale, he distilled what actually works into a practical, recipe driven guide. Over time, Šimon saw the same problems show up again and again: bloated files, broken handoffs, and design systems that couldn't scale. This book is his way of sharing the patterns, tools, and habits that helped teams move past those roadblocks and build stronger, more connected design processes in Figma. Inside, you'll learn how to structure files for real collaboration, use design tokens without chaos, build accessible, scalable libraries, and hand off to developers with confidence. You'll see how to automate repetitive work with plugins and AI, run async reviews, and bake feedback loops into your process so projects keep moving without losing polish. What you will learn: Master advanced collaboration workflows to reduce rework and keep design projects moving. Build scalable design systems with tokens, variables, and accessible components. Deliver clean handoffs using specs, annotations, exports, and Dev Mode. Create accessible systems that meet WCAG standards and work at scale. Engage

stakeholders effectively through clear reviews and interactive presentations Leverage plugins and AI to automate tasks and accelerate design work Who this book is for This book is written for UX and UI designers who already have a basic understanding of Figma and want to advance beyond the fundamentals Product managers and developers who work closely with design teams will also benefit from learning design practices building scalable systems and better collaboration practices Inventive Computation and Information Technologies S.
