The Global Information Society Wendy Currie, 2000-05-18 The Global Information Society Wendy Currie The last few decades have witnessed profound changes in the structure culture management and technology of organisations Just as information technology offers both opportunities and threats to organisations the Internet and its potential for electronic commerce poses fresh challenges So far much hype surrounds the subject of electronic commerce and its possibilities for leveraging business advantage Whilst governments on both sides of the Atlantic urge companies to invest in Internet technology and develop e business past lessons from IT investment have often been disappointing Likewise the rapid growth of IT outsourcing in the 1980s and 1990s produced mixed results Whereas some companies successfully reduced costs and improved their performance through outsourcing others were permanently damaged as management failed to address important issues relating to the IT strategy and infrastructure The Global Information Society addresses the phenomenon of the global information society in the context of market technology management practice capabilities and skills and the role of government Designed for academics practitioners and students this book does not offer simple solutions to complex business problems Instead it critically evaluates models frameworks debates and observations relating to these five key themes within the global information society
