Sasikala, Benny Mathur, 2025-11-13. *Social Media 2.0 Powered by Artificial Intelligence: Preparing Future Media Professionals for an AI-Integrated World* is a comprehensive guide designed for students, educators, and emerging professionals in the field of New Media Studies. In an era where social platforms are not just communication tools but intelligent ecosystems, this book explores how Artificial Intelligence is reshaping the way we create, share, consume, and interpret content online. From AI-powered content generation and recommendation systems to data analytics, automation, and ethical implications, the book covers it all in a manner that is both academically grounded and practically applicable. Divided into three core sections, the first part lays the foundation by examining social media's evolution, platform dynamics, content planning, and branding. The second part dives into the transformative role of AI, showcasing how machine intelligence is integrated into social platforms, from chatbots and sentiment analysis to virtual influencers and personalized feeds. The third part is focused on the topic of social media for public relations and how public relations agencies can leverage the power of social media. Developed with a special focus on the Indian digital landscape, this text bridges global trends with local relevance. Each chapter is enriched with case studies, key concepts, real-world examples, and reflective questions to encourage critical thinking and hands-on learning. Whether you're a student beginning your journey in digital media or a teacher seeking structured content for your classroom, this book offers a future-facing framework to navigate and lead in a media environment increasingly shaped by AI. [An Introduction to Narrative Generators](#) Rafael Pérez y Pérez, Mike Sharples, 2023. Combining an introduction to relevant concepts related to automatic storytelling with accessible descriptions of well-known computer programs that illustrate how such concepts are employed, the book is aimed at an interdisciplinary audience and assumes little or no background in computer science. **Artificial Media** Nelson Zagalo, Damián Keller, 2025-07-29. A groundbreaking exploration of the evolving relationship between the fields of artificial intelligence and creativity studies, *Artificial Media* charts the course of a transformative path toward hybrid methodologies involving computing and human-centric approaches. Scholars and practitioners from leading research centers in South America, Asia, and Europe delve into theoretical and philosophical frameworks, practical deployments, and data-based critical analyses of artificial media initiatives that reconfigure authorship and collaboration. Co-creation, collective memory, and situated knowledge practices are featured in multiple hands-on examples of technological design, music, visual arts, journalistic, and educational projects that address the ethical and social implications of generative techniques. Through an interdisciplinary lens, this collection projects a nuanced panorama of both the remarkable results and the complex challenges of emerging artificial media methods, offering practical insights for anyone seeking to engage with the future of creativity in the age of autonomous machines.
