Contemporary Work and the Future of Employment in Developed Countries Peter Holland, Chris Brewster, 2020-01-23 Whilst only in the second decade of the 21st century we have seen significant and fundamental change in the way we work, where we work, how we work, and the conditions of work. The continued advancements of smart technology and artificial intelligence, globalisation, and deregulation can provide a sleek view of the world of work. This paradigm can deliver the opportunity to both control work and provide new challenges in this emerging virtual and global workplace with 24/7 connectivity as the boundaries of the traditional organisation melt away. Throughout the developed world, the notions of work and employment are becoming increasingly separated, and for some, this will provide new opportunities in entrepreneurial and self-managed work. However, the alternate or bleak perspective is a world of work where globalisation and technology work together to eliminate or minimise employment, underpinning standardised employment with less and less stable or secure work, typified by the rise of the gig economy and creating more extreme work in terms of working hours, conditions, and rewards. These aspects of work are likely to have a significant negative impact on the workforce in these environments. These transformations are creating renewed interest in how work and the workforce is organised and managed, and its relationship to employment in a period when all predictions are that the pace of change will only accelerate. *Raw Deal* Steven Hill, 2015-10-20 What's going to happen to my job? That's what an increasing number of anxious Americans are asking themselves. The US workforce, which has been one of the most productive and wealthiest in the world, is undergoing an alarming transformation. Increasing numbers of workers find themselves on shaky ground, turned into freelancers, temps, and

contractors Even many full time and professional jobs are experiencing this precarious shift Within a decade a near majority of the 145 million employed Americans will be impacted Add to that the steamroller of automation robots and artificial intelligence already replacing millions of workers and projected to obsolesce millions more and the jobs picture starts looking grim Now a weird yet historic mash up of Silicon Valley technology and Wall Street greed is thrusting upon us the latest economic fraud the so called sharing economy with companies like Uber Airbnb and TaskRabbit allegedly liberating workers to become independent and their own CEOs hiring themselves out for ever smaller jobs and wages while the companies profit But this share the crumbs economy is just the tip of a looming iceberg that the middle class is drifting toward Raw Deal How the Uber Economy and Runaway Capitalism Are Screwing American Workers by veteran journalist Steven Hill is an exposé that challenges conventional thinking and the hype celebrating this new economy by showing why the vision of the technosapient leaders and their Ayn Rand libertarianism is a dead end In Raw Deal Steven Hill proposes pragmatic policy solutions to transform the US economy and its safety net and social contract launching a new kind of deal to restore power back into the hands of American workers
