**The Future of Clothing** Simone Achermann, Stephan Sigrist, 2023-06-01

Disappearing dress codes, customers as designers and wearable technology in recent years: the production and function of clothing has undergone massive change. New manufacturing technologies have brought bespoke design within reach of many consumers for the first time. Miniature sensors can turn ordinary garments into smart devices. And blurring gender roles and class distinctions point the way towards a more fluid approach to clothing, fashion and design. *The Future of Clothing* offers a critical introduction to these developments from an interdisciplinary perspective, engaging with their implications for the clothing industry and related fields. You'll learn how mass personalization impacts the luxury market, the effects of automation on craftsmanship and how AI design may affect individual style choices. Contributors include fashion historian and broadcaster Amber Butchart, adventurer, ecologist and head of the Sculpt the Future Foundation David de Rothschild and best-selling author Yuval Noah Harari. There are also 8 exclusive illustrations by Salvador Dalí depicting the surrealist master's extraordinary vision of how fine-tailored clothing might evolve in the 21st century. Together they form a truly unique guide to the future of this most creative industry.

*Innovations and Applications of Technology in Language Education* Hung Phu Bui, Raghvendra Kumar, Nilayam Kumar Kamila, 2024-07-12

The linguistics and language education world has recently experienced a rapidly proliferating interest in applying technology. This interdisciplinary area bridges the gap between two previously separate fields. *Innovations and Applications of Technology in Language Education* is a collection of 12 chapters by an international group of language and linguistics education experts. Although technology in language education is a global interest, its practices should be contextualized. This book covers how language educational technology is currently applied, discusses how it should be applied and gives directions for its future development. Providing a critical review of respective current practices and perspectives, this book begins by presenting a set of research-based principles for developing second language teachers' professionalism. It then examines the use of technology to enhance students' English.

language skills Acknowledging the advantages and disadvantages of AI mediated communication this book argues for the use of AI to facilitate communication in language education It also proposes the use of AI to develop and administer language tests and suggests guidelines for practitioners to deploy AI in developing and administering language tests efficiently This book concludes by discussing technology for specific purposes in second language education and the potential of computer mediated communication CMC to enhance interaction between students
