Barrett, 2025-09-04 Today's software applications need more than a friendly interface and correct algorithms They also need to be responsible to be beneficial for society and not cause harm In an era of AI chatbots deep fake images and videos social media bubbles expanding privacy regulations and a warming planet it's more important than ever to practice responsible software engineering so your products earn your users trust and deserve it Responsible Software Engineering gathers the wisdom of over 100 Google employees to help you anticipate the effects of your software on the world and its inhabitants It features expert advice and practical case studies so you can build better applications that are more ready for real world situations Treating people more fairly regardless of their beliefs culture skin tone and other attributes Operating more safely to reduce the risk of physical psychological or financial harm Better protecting people's privacy particularly when collecting personal information Incorporating wisdom from the social sciences law ethics and other fields that many engineers may be unfamiliar with Reducing emissions of carbon dioxide CO2 to address the risks of climate change **Goodbye Trust** Dick Stroud, 2024-07-24 A healthy and prosperous society needs efficient and trusted institutions Yet the West is experiencing plummeting levels of trust in academia the media politics business the

justice system and financial regulators Unhappiness and mental health problems are skyrocketing especially among the young What the hell is going on Everybody has their pet theory it s because of the pandemic social media is addling our minds it s all Donald Trump s fault Or as Elon Musk believes it s the woke mind virus You know what I think it might be a bit more complicated I wasn t satisfied with these superficial explanations After lots of research and questioning I now understand what s happening Much of what I discovered is disturbing some is scary and a few details are even amusing These nine essays present my findings Six focus on the institutions and additional essays explore language manipulation and the new moral and political divides The final essay examines those common afflictions destroying our institutions to make sense of it all This haemorrhaging of trust has disturbing consequences and the woke explanation for what s happening doesn t begin to address the complexity of the situation Sadly good old fashioned incompetence deceit and vanity are to blame
