Shayor,Kelina Lowther-Harris,Kirthana Srinivasan,Anoushka Samanta,2024-04-16 The emergence of Generative AI has marked a significant turning point heralding a new age of innovation and intellectual exploration Much like a compelling narrative this advancement in artificial intelligence has captivated the global community and ushered in an unprecedented surge of innovation For many years the subtle hum of AI has been interconnected into the fabric of our society Devices such as Echo Alexa and Google Home once considered avant garde are now seamlessly integrated into our homes and vehicles becoming essential navigators in our daily journeys However this new phase of AI evolution is distinct Capable of enhanced ability these new generative AI systems could easily discern the intuitive needs of their end users With a mere command or a simple image generative AI systems can draft comprehensive reports write legal documents or produce intricate visual masterpieces Their proficiency can also be extended to routine and mundane tasks smoothly managing administrative duties writing correspondences and providing invaluable support in professional settings Although these foundation models require a vast amount of training data and billions of parameters to be effective the outcomes are equally remarkable Technology companies and investors recognising the potential embarked on an investment spree steering a new era for the development of specialised models such as Microsoft CoPilot Midjourney ChatGPT and so on As these technology companies continue to improve their language models each version seems to be more refined than its predecessor Foremost among these are the Large Language Models LLMs emblematic of this AI renaissance Now with voice activated capabilities generative AIs have become capable of much more in the relatively short span of their existence With the integration of voice activated features combined with their capabilities to speak like a human being their potential continues to grow exponentially They aren t labelled as chatbots anymore these AI systems signify a technological paradigm shift reshaping humanity s understanding of technology automation and creative expression However with such shift comes the imperative need for governance and control The unchecked expansion of AI poses unmitigated challenges In reality these advanced AIs have the potential to be transformative and destructive parallelly Thus it is necessary to establish guidelines and oversight to ensure the ethical deployment of such systems which this book focuses on As society stands at this transformative crossroads parallels are being drawn to the imaginative world of fiction The concept of Jarvis AI from the fictitious world appears provocatively close to becoming a reality The epoch of generative AI has truly dawned promising a future where technological prowess and human aspiration unite These Strange New Minds Christopher Summerfield,2025-03-11 An insider look at the Large

Language Models LLMs that are revolutionizing our relationship to technology exploring their surprising history what they can and should do for us today and where they will go in the future from an AI pioneer and neuroscientist In this accessible up to date and authoritative examination of the world s most radical technology neuroscientist and AI researcher Christopher Summerfield explores what it really takes to build a brain from scratch We have entered a world in which disarmingly human like chatbots such as ChatGPT Claude and Bard appear to be able to talk and reason like us and are beginning to transform everything we do But can AI think know and understand What are its values Whose biases is it perpetuating Can it lie and if so could we tell Does their arrival threaten our very existence These Strange New Minds charts the evolution of intelligent talking machines and provides us with the tools to understand how they work and how we can use them Ultimately armed with an understanding of AI s mysterious inner workings we can begin to grapple with the existential question of our age have we written ourselves out of history or is a technological utopia ahead
