Doing Digital Film History Sarah-Mai Dang,Tim van der Heijden,Christian Gosvig Olesen,2024-12-30 How has the digital turn shaped the practices of film historical research and teaching While computational approaches have been used by film historians since the 1960s and 1970s the arrival and use of digital tools and methods in recent decades has fundamentally changed the ways we search analyze interpret present and so think and write about film history from digital archival and curatorial practices data driven search and analysis of film historical collections to the visualization and dissemination of film historical materials online While film historians have increasingly embraced the new possibilities brought by digital technologies their practical epistemological and methodological implications need further exploration What opportunities does the digitization of film historical sources provide for film

historians What new questions can be raised by using digital methods What new perspectives emerge from analyzing interpreting and visualizing film historical data at the levels of both close and distant or scalable reading and viewing By focusing on the concepts tools and practices of digital film historiography this edited volume aims to contribute to a better understanding and critical reflection on the changes and continuities of doing film history in the digital age **Expert Podcasting Practices For Dummies** Tee Morris,Evo Terra,Ryan C. Williams,2008-01-07 A guide to audio and video podcasting covers such topics as developing a podcast podcasting equipment and tools recording a podcast encoding software the video and audio editing process getting listed in podcast directories the podcast community and making money with podcasting [How to Start a Podcast Using AI](#) Benjamin Pollack,2025-08-21 We are in a sweet spot AI tools are polished enough to deliver professional results The podcasting space is still wide open for new voices Most people still don't realize how easy it's become to start If you wait another two years the market will be more crowded and your unique idea might already be taken by someone else Starting a podcast in 2025 is like starting a YouTube channel in 2010 the wave is building but it hasn't fully crested yet If you get in now you can ride the momentum as AI reshapes the industry This book gives you the roadmap the tools and the prompts to launch your podcast with confidence Inside you'll learn how to Plan your show and define your audience Build your podcast brand with AI powered tools Record and edit episodes quickly with professional results Distribute your show across major platforms Grow your audience and community Monetize your content and create sustainable income Avoid AI pitfalls while keeping your authentic voice You don't need a studio or expensive equipment just your voice a laptop and the willingness to start With the help of AI you can cut your production time in half create better content faster and focus on what matters most connecting with your listeners Whether you're an entrepreneur educator storyteller or simply someone with a passion to share this guide will help you go from idea to published podcast in days instead of months Your audience is already out there scrolling through Apple Podcasts or Spotify looking for someone like you This book will help you make sure they find you **Empire of AI** Karen Hao,2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With Empire of AI Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in

2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era
