*The Almighty Machine* Pekka Vahvanen, 2022-02-25. The hymn of Digitalization is nothing new. We must encourage the creation of new apps. We must develop AI in order to prevail among international competition. Technology's advance will halt climate change and let robots do the dumb stuff for us. Our faith in technology is powerful because it has saved us in the past. The Almighty Machine shows us technology's flip side. The things that once powered us toward a brighter tomorrow are already undermining our quality of life. The data stream has shattered our concentration; human relationships have been reduced to a menu of emojis; constant surveillance has nullified much of our privacy; and the development of AI could be the beginning of the end for us. We are becoming the casualties of our own success. Pekka Vahvanen's bristling and timely critique, deftly translated by Mark Jones, throws doubt on the necessity of technological development in a world saturated in tech. The Almighty Machine presents an important question: Does progress no longer make us happier?

*Examining the Impact of Industry 4.0 on Academic Libraries* Josiline Phiri Chigwada, Ngozi Maria Nwaohiri, 2021-01-08. Due to the rapid acceleration of industry 4.0, it is more important than ever to understand the impact of technological revolutions on the academic library. This edited collection showcases the effects on how libraries function, manage processes, and continue to deliver products and services on a day-to-day basis.

**The Digital Future of English** Simone Murray, 2025-07-18. More than any other academic discipline, literary studies is the creation of print culture. How then can it thrive in the digital era? Early 1990s predictions of the book's imminent demise presented a simplistic either/or choice between the legacy of moribund print and triumphalist digital technology. Yet we have grown to experience the two media as complexly interdependent and even complementary. Clearly, digital does not kill print. But literary studies in the digital era cannot simply resume business as usual. It is urgently necessary to reconsider the discipline's founding assumptions in light of digital technology. The digital era prompts a rethinking of literary studies' object of study as well as its methods, theories, audiences, and pedagogical practices. What counts as literature necessarily shifts in an age of proliferating born-digital texts and do-it-yourself DIY online publication. Where should literary studies sit institutionally, and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis? Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect? Who is the audience for literary

criticism in an age where expertise is routinely challenged yet communication with global book loving publics has never been technologically easier Finally how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial age students Literary studies has been convulsed for decades by debates over electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology s impact on the underpinning tenets of the discipline Literary Media Studies is pitched at fellow literary scholars book historians media theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies digital future Invocational Media Chris Chesher,2023-10-19 Invocational Media critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media

*AI Chatbots* James Crowder, 2023-11-02

This book explores the subject of artificial psychology from the standpoint of how online Chatbots have infiltrated and affected societies and the world in general. The book explores the psychological effects of depending on an online entity for our needs even if it's a reminder of scheduled events. The author provides insight into the notion of human Chatbot exchanges, understanding and false emotions both from the Chatbot and from the human. He goes on to investigate and discuss the dangers of too much reliance on technology that learns from a variety of sources and how some sources can negatively influence Chatbots and by doing so negatively affect people. The book also discusses human Chatbot interactions and the natural language interfaces required to respond adequately to humans. Lastly, the author explores the notion of ethical considerations for people based on their interactions with Chatbots, including information based on cultural differences between different regions of the world.
