Digitalization in Healthcare Patrick Glauner, Philipp Plugmann, Guido Lerzynski, 2021-03-13 Digital technologies are currently dramatically changing healthcare This book introduces the reader to the latest digital innovations in healthcare in fields such as artificial intelligence points out new ways in patient care and

describes the limits of its application. It also offers essential guidance in the form of structured and authoritative contributions by domain experts spanning from artificial intelligence to hospital management to radiology to dentistry to preventive medicine. Furthermore, it shares ideas and experiences of industry veterans in particular on how IT-driven solutions could solve long-standing issues in the fields of healthcare and hospitalization. It also gives advice on what new digital technologies to consider for becoming a healthcare market leader in the future. Taken together, these contributions provide a road map to guide decision makers, physicians, academics, industry representatives, and other interested readers to understand the large impact of digital technology on healthcare today and its enormous potential for future development.

**Report of the Committee of Experts on the Application of Conventions and Recommendations (articles 19 and 22 of the Constitution).** International Labour Office. Committee of Experts on the Application of Conventions and Recommendations, 2006. Intentioning Gloria Feldt, 2021-09-28. Intentioning by best-selling author Gloria Feldt will help you envision the life and career you might have thought were impossible dreams, then give you the courage and actionable tools to achieve them. In the wake of the coronavirus pandemic and a pandemic of racial injustice that together shook our world to its core and revealed deep fault lines in our culture, Gloria Feldt, New York Times best-selling author, speaker, commentator, international leadership expert, successful CEO, and feminist icon, shows how we can seize the once-in-a-lifetime opportunity created by massive disruption to build back stronger with diverse women at the center of the recovery. In Intentioning Sex Power Pandemics and How Women Will Take The Lead for Everyone's Good, Feldt inspires diverse women to embrace their personal power to lead with intention, confidence, and joy. It comes as no surprise to her that women flexed their formidable muscles when needed most, representing a disproportionate number of essential workers during the darkest days of the coronavirus global outbreak and leading the charge against racism in the United States. But this book is decidedly about the future, taking the leadership lessons learned from this disruption and creating a better world for all. Feldt not only unveils the next step in advancing gender parity in all spheres of business and life but she also lays out the vital next steps in the overall advancement of our economy and our civilization. The Lead Like a Woman framework and the 9 Leadership Intentioning Tools she presents in this book will prepare, motivate, and propel women of all diversities and intersectionalities now so that by 2025, women will have attained their fair and equal share of leadership positions across all sectors of industry and society. We simply cannot squander women's talents when so much hangs in the balance. Women must be at the vanguard of reimagining and reconstructing a vibrant and sustainable future for us all. Depletion Shirin M. Rai, 2024-07-17. When thinking about the work of caring for others, we often neglect the human cost borne by those performing this care. Feminists have long talked about the ways in which unpaid work, particularly performed in the home, is habitually undervalued by society, but the work of caring for people, both paid and unpaid, can also take a toll on the health of individuals, households, and communities when we give more than we receive. This lopsided gap between outflows and inflows, as this book argues, is

depletion In Depletion Shirin M Rai examines the human costs of care work and how these are reproduced across the boundaries of class race gender and generation Depletion can be physical as measured by the body mass index exhaustion sleeplessness and vital health signs It can also be mental manifesting as self doubt guilt and apprehension and the failure to take time for oneself family friends and community Moreover depletion has effects that extend well beyond the individual to households and communities Including case studies from different parts of the world and building on various methodologies Rai looks at the costs of care work or what she calls social reproduction in several forms biological reproduction unpaid work in the home and cultural and ideological work necessary to maintain social relations beyond the household Various chapters examine the costs of commuting to work and for care the value of unpaid work performed by women of different classes the costs of household work performed by children and the costs to communities when local economies are challenged by corporate interests Lastly Rai argues that depletion must be recognized in order for it to be reversed the struggles to reverse depletion are struggles for a good life generative of new imaginings of how care work both draining and joyful can be reorganized for a better future for all
