*Arguing A.I.* Sam Williams, 2002-01-22. In *Arguing A.I.* journalist Sam Williams charts both the history of artificial intelligence from its scientific and philosophical roots and the history of the A.I. debate. He examines how and why the tenor of the debate has changed over the last half-decade in particular as scientists are struggling to take into account the latest breakthroughs in computer science, information technology, and human biology. For every voice predicting machines like 2001's HAL within the next twenty to thirty years, others have emerged with more pessimistic forecasts. From artificial intelligence's pioneers John McCarthy and Marvin Minsky to futurist authors Ray Kurzweil and Hans Moravec to software architects Bill Joy and Jaron Lanier, *Arguing A.I.* introduces readers to the people participating in the current debate, both proponents and critics of A.I. who are changing the way computers think and the way we think about computers.
