Frege's Pragmatics Thorsten Sander, 2025-05-15 Uncovering an aspect of Gottlob Frege's linguistic theorizing that has until now received little attention this volume offers the first detailed exposition of Frege's pragmatics Thorsten Sander explores his views on colouring side thoughts presuppositions indexicals and illocutionary force and closely relates these to current research in philosophy of language and linguistics Throughout his career Frege was concerned with various secondary aspects of meaning He claims for instance that the two words dog and cur differ not in what he calls sense but merely in colouring By contrast the difference between morning star and evening star is supposed to be a matter of sense How exactly does sense differ from colouring Frege also claims that by using a proper name one presupposes the existence of its bearer and that our utterances are frequently associated with side thoughts What exactly does he mean by these terms and wherein lies the difference between these phenomena Frege's Pragmatics answers questions such as these providing a fresh perspective on Frege's account of various pragmatic aspects of language In this first book length treatment Sander makes the case that Frege's groundbreaking ideas are an essential part of his overall philosophical enterprise **Producing**
