results that present solutions to meet the ever increasing demand of industries

Bridging Horizons in Artificial Intelligence, Robotics, Cybersecurity, Smart Cities, and Digital Economy Klodian Dhoska, Evjola Spaho, 2025-03-15

This book aims to foster interdisciplinary research among industry and academic participants and form long term strategic links. It provides a presentation of new knowledge and development through the exchange of practical experience between industry scientific institutes and business. The carefully selected conference themes have been chosen to engender these in the fields of engineering, industry information technology, business, economics and finance and applied sciences. This book aims to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of artificial intelligence, cybersecurity, robotics and automation, smart technologies, data analytics and data science, network and communication, cloud and mobile computing, Internet of things, virtual, augmented and mixed reality technology in applied science, digital economy, management and business, finance and accounting, statistics and econometrics, economics and social sciences.

Design and Development of Emerging Chatbot Technology Darwish, Dina, 2024-04-09

In the field of information retrieval, the challenge lies in the speed and accuracy with which users can access relevant data. With the increasing complexity of digital interactions, the need for a solution that transcends traditional methods becomes evident. Human involvement and manual investigation are not only time consuming but also prone to errors, hindering the seamless exchange of information in various sectors. Design and Development of Emerging Chatbot Technology emerges as a comprehensive solution to the predicament posed by traditional information retrieval methods. Focusing on the transformative power of chatbots, it delves into the intricacies of their operation, applications and development. Designed for academic scholars across diverse disciplines, the book serves as a beacon for those seeking a deeper understanding of chatbots and their potential to revolutionize information retrieval in customer service, education, healthcare, e-commerce and more.

Artificial Intelligence for Marketing Jim Sterne, 2017-08-02

A straightforward, non-technical guide to the next major marketing tool. Artificial Intelligence for Marketing presents a tightly focused introduction to machine learning, written specifically for marketing professionals. This book will not teach you to be a data scientist, but it does explain how Artificial Intelligence and Machine Learning will revolutionize your company's marketing strategy and teach you how to use it most effectively. Data and analytics have become table stakes in modern marketing, but the field is ever evolving, with data scientists continually developing new algorithms. Where does that leave you? How can marketers use the latest data science developments to their advantage? This book walks you through the need-to-know aspects of Artificial Intelligence, including natural language processing, speech recognition, and the power of Machine Learning, to show you how to make the most of this technology in a practical, tactical way. Simple illustrations clarify complex concepts, and case studies show how real-world companies are taking the next leap forward. Straightforward, pragmatic, and with no math required, this book will help you speak intelligently about Artificial

Intelligence and its advantages in marketing Understand how marketers without a Data Science degree can make use of machine learning technology Collaborate with data scientists as a subject matter expert to help develop focused use applications Help your company gain a competitive advantage by leveraging leading edge technology in marketing Marketing and data science are two fast moving turbulent spheres that often intersect that intersection is where marketing professionals pick up the tools and methods to move their company forward Artificial Intelligence and Machine Learning provide a data driven basis for more robust and intensely targeted marketing strategies and companies that effectively utilize these latest tools will reap the benefit in the marketplace Artificial Intelligence for Marketing provides a nontechnical crash course to help you stay ahead of the curve
