Generative AI Dr. Mohammad Shahid, Ms. Teresa Kwamboka Abuya, Mrs. A. Nazreen, Mr. B. Sivakumar, 2025-08-27

Generative AI is a comprehensive exploration of the transformative power of artificial intelligence in creating original and dynamic digital content. This book introduces readers to the fundamentals of generative models, tracing their evolution from early machine learning techniques to advanced architectures such as GANs, VAEs, diffusion models, and large language models (LLMs). It explains how these systems learn patterns, mimic creativity, and generate text, images, music, and even code that closely resembles human output. The book goes beyond theory, offering practical insights, case studies, and real-world applications of generative AI in diverse fields including healthcare, education, design, finance, entertainment, cybersecurity, and scientific research. It also highlights the ethical and societal challenges posed by this technology, such as misinformation, deepfakes, intellectual property concerns, and bias in AI-generated content, while emphasizing the importance of responsible innovation and governance. Designed for students, researchers, professionals, and technology enthusiasts, this book serves as both an academic reference and a practical guide. By bridging conceptual understanding with applied knowledge, it empowers readers to harness generative AI for creativity, innovation, and problem-solving. Richly detailed and future-focused, Generative AI provides a roadmap to understanding one of the most significant technological revolutions of our time. Backpacker
